Internal Risk Factors

- 1. Restrictive or penal order may be passed against us by the RBI in on-going and / or future proceedings that could hamper our operations or services, or a part thereof, or levy penalties in connection therewith, which may in turn adversely affect our operations and profitability.***

RBI issued a show cause notice dated April 28, 2017 (“SCN”) under Section 58 G (2) of the RBI Act, against our Company, in relation to an inspection under Section 45N of the RBI Act, which was conducted from August 8, 2016 to August 19, 2016. In the SCN, the RBI has alleged that our Company did not maintain application forms and other KYC documents in respect of privately placed non-convertible debentures and subordinated debt instruments in violation of para II.3.(ii) of the instructions contained in the RBI circular bearing reference DNBR.PD(CC)No. 51/03.10.119/2015-16 dated July 1, 2015. In this regard, RBI had issued a supervisory letter dated September 8, 2016 which was responded to by our Company vide its letter dated October 5, 2016. Upon due examination, our Company’s responses were found unsatisfactory by the RBI. In the SCN, the RBI asked our Company to show cause as to why a penalty of ₹5,00,000 for contravention of KYC norms and further penalty of ₹25,000 per day during which such contravention subsisted, should not be levied on our Company, under Section 58 G(1)(b) read with Section 58-B(5)(aa) of the RBI Act.

Our Company vide its letter dated May 13, 2017 (“Reply”), responded to the allegations levied by the RBI in the SCN and submitted that two of the three branches of our Company, where the inspection had taken place were unable to produce the relevant applications and KYC documents, on time although the same were available with our Company, on account of shifting of the said documents to our regional office in Kottayam and from there to other premises. Our Company further informed the RBI that the relevant documents were maintained at our Company’s head office and that our Company had also developed a software to track the application and KYC forms of its privately placed debenture holders and that the process of digitisation was ongoing. Subsequently, RBI vide its letter dated June 19, 2017, directed our Company to submit all necessary documents, including offer documents, information memorandums, application forms, KYC details and other information to the RBI. Our Company vide its letter dated July 12, 2017 informed the RBI that our statutory auditors were replaced and therefore our Company sought an extension of time to comply with RBI’s directions.

Vide a subsequent letter dated July 14, 2017, RBI allowed our Company an extension of time up to July 19, 2017, on account of appointment of our Statutory Auditors and also asked for certain certifications from both our Statutory Auditors and our previous auditors along with submitting the relevant documents pertaining to application forms and KYC for the privately placed debentures.

Our Company vide a letter dated July 19, 2017 submitted the requisite details to the RBI and the matter is currently pending before the appointed designated authority of the RBI. There can be no assurance that RBI will not pass an order levying penalty, which may in turn adversely affect our reputation, business, operations and profitability. For details of the RBI's show cause notice, please refer to the section titled "*Outstanding Litigations*" beginning on page 164 of this Draft Prospectus.

2. *We have been subject to an inspection by the RBI and any adverse action taken could affect our business and operations.*

Our Company was subjected to RBI's inspection under Section 45N of the RBI Act, from August 7, 2017 to August 19, 2017, for the financial position as on March 31, 2017. Subsequently RBI vide its letter dated December 8, 2017, bearing reference number DNBS (T) No. 455/02.19.002/2017-18 observed certain major supervisory concerns which *inter alia* include (i) irregularities in gold loans; (ii) violation of FPC guidelines and LTV norms; (iii) deviation from the loan policy by sanctioning high value loans without taking approval from management committee along with rescheduling of loans without request from borrower without valuation of collateral; (iv) failure to conduct IS audit, annual review of fraud and failure to conduct audit of the head office where all the loans are scrutinised and sanctioned; (v) deficiencies in issue of NCDs by payment of interest on perpetual debt instruments on a cumulative basis in violation of RBI guidelines and failure to regularise the payment along with undertaking public issues without creating required DRR; and (vi) pending compliance with previous RBI inspection report in relation to premature closure of debentures, IT systems, adherence to KYC/AML guidelines, non-transparent gold auction process, etc. Further RBI also listed out its salient observations in relation to its inspection. Our Company addressed the concern raised by the RBI's in its inspection letter and replied vide a letter dated January 12, 2018, *inter alia* detailing and categorically responding to all the observations made by the RBI, accounting for the various measures undertaken for addressing and redressing the alleged non-compliances. While our Company has responded to the RBI's inspection letter, any adverse action taken by RBI with regard to such inspections could adversely affect our business and operations.

3. *We have received a letter dated February 10, 2014 from the RBI ("RBI Letter") inter-alia alleging non-compliance with RBI circular DNBS (T) No. 983/02.03.057/2013-14 dated October 29, 2008 ("RBI Circular"). Further, we have also received a letter dated July 29, 2016 from the RBI, pursuant to an inspection under Section 12(1) of the FEMA, relating to our money changing business ("RBI Inspection Letter"). Any adverse order by RBI could adversely affect our ability to conduct business, which would in turn result in material adverse effect on our business and results of operations.*

Our Company has received the RBI Letter inter-alia alleging that the PDI issued by our Company are not in full compliance with the RBI Circular as our Company was allowing a fixed maturity period of 10 years and the reporting requirements were also not adhered to. Our Company has replied vide letter dated March 21, 2014 to the RBI Letter amongst others submitting the requisite documents to RBI.

Further, the interest payable on the PDI outstanding was also classified by us as cumulative, which is not in accordance with the RBI Circular. Subsequently, the Company has dispensed with its liability pertaining to the accrued interests on the PDIs and have remitted the amount vide cheques to the respective investors. Also, the RBI was intimated of the said payment, vide a letter dated March 18, 2016. In case RBI passes an adverse order, it may adversely affect our ability to conduct business, which would in turn result in material adverse effect on our business and results of operations. The RBI vide a letter dated March 28, 2016, advised our Company on payment to PDI holders on a non-cumulative basis and sought confirmations from our statutory auditor with regard to clearing of the cheques.

Additionally, our Company has also received the RBI Inspection Letter wherein the RBI has observed certain irregularities and deficiencies in relation to our money changing business, such as unavailability of the declaration by the Directors on 'fit and proper criteria' as on March 31, 2016; failure to submit the annual statement showing foreign currency as written-off as on March 31, 2016; non-conformity of application cum declaration format used for sale for foreign exchange with instructions issued by the RBI; unavailability of statutory auditor's certificate on compliance with KYC/AML/CFT guidelines; and non-submission of audited balance sheet and NOF certificate as on March 31, 2016. Consequently, our Company has been directed by the RBI to take necessary action and rectification and to submit a compliance within a period of 30 days from the date of receipt of the RBI Inspection Letter. Our Company has responded to the RBI vide a letter dated August 12, 2016, wherein our Company has categorically addressed the concerns raised by the RBI, such as with a declaration of fit and proper person criteria, submission of annual statement with details of foreign

currency being written off, changes carried out in the application cum declaration form, compliance with KYC/AML/CFT guidelines in relation to money changing activities and submission of audited balance sheet and net owned funds certificate as on March 31, 2016. Subsequently, RBI vide letters dated September 20, 2016 and November 30, 2016 directed our Company to rectify deficiencies detected during the RBI inspection. Our Company vide its letter dated December 15, 2016 confirmed compliance with the instructions regarding the application cum declaration form and submitted date wise data of forex purchased and sold by its authorised branches for period from November 8, 2016 to November 30, 2016. Any adverse action taken by RBI with regard to such inspections could adversely affect our business and operations.

4. *We are subject to inspections by CDSL in our capacity as a depository participant and any adverse action taken by CDSL could affect our business and operations.*

Our Company in its capacity as a depository participant received a letter dated July 28, 2016 from the CDSL, pursuant to an inspection of our Company, undertaken by CDSL for the period between August 1, 2015 to June 30, 2016. CDSL vide its letter instructed our Company to submit certain confirmations regarding implementations of certain procedures and rectifications of certain deviations. Our Company vide a letter dated August 24, 2016 responded to CDSL with a compliance report certified by our internal auditors, wherein our Company categorically clarified every concern raised by CDSL. Subsequently, CDSL conducted an inspection for the period between July 1, 2016 to June 30, 2017 and vide letters dated July 15, 2017 and August 18, 2017 instructed our Company to submit further confirmations regarding implementation of certain procedures and rectifications, in response to which our Company vide its letters dated August 12, 2017 and August 25, 2017 respectively, furnished its response to CDSL. While our Company strives to address all the concerns raised by CDSL in its inspection letters, there can be no guarantee that CDSL shall be satisfied with our Company's responses and that the CDSL shall not take an adverse action with regard to such inspections. Any such adverse actions by CDSL could adversely affect our business and operations.

5. *Our ability to access capital also depends on our credit ratings. Any downgrade in our credit ratings would increase borrowing costs and constrain our access to capital and lending markets and, thus, would negatively affect our net interest margin and our business.*

The cost and availability of capital is also dependent on our short-term and long-term credit ratings. India Ratings vide their letter dated February 20, 2018 have rated our proposed bank loans of ₹70,000 lakhs. Further, our Company has received rating of 'IND BBB-': Outlook Stable for the NCDs proposed to be issued under this Issue for an amount of up to ₹30,000 lakhs. Ratings reflect a rating agency's opinion of our financial strength, operating performance, strategic position, and ability to meet our obligations. Any, downgrade of our credit ratings would increase borrowing costs and constrain our access to debt and bank lending markets and, thus, would adversely affect our business. In addition, downgrading of our credit ratings could increase the possibility of additional terms and conditions being added to any new or replacement financing arrangements. For details regarding ratings received by our Company, please refer to "Our Business-Our Borrowings and Credit Ratings" on page 90.

6. *Our Company, two of our Promoter Directors and one of our Group Companies are subject to certain legal proceedings and any adverse decision in such proceedings may have a material adverse effect on our business, financial condition and results of operations.*

We, two of our Promoter Directors and one of our Group Companies are subject to certain legal proceedings including civil suits, consumer litigations, tax litigations, trademark infringement suits etc. We incur substantial cost in defending these proceedings before a court of law. Moreover, we are unable to assure you that we or our Promoter Directors or our Group Company shall be successful in any or all of these actions. In the event, we or our Promoter Directors suffer any adverse order, our reputation may suffer and may have an adverse impact on our business and results of operations. We cannot assure that an adverse order by any statutory or governmental authority would not have a negative impact on our profit and financial condition. For further details of the legal proceedings that we are subject to, please refer to the chapter titled "Outstanding Litigations" on page 164.

7. *One of our Group Companies is enabled by its memorandum of association to undertake activities similar to the activities conducted by our Company which may be a potential source of conflict of interest for us and which may have an adverse effect on our operations.*

Our Promoter Directors are the sole shareholders and directors on the board of our Group Company, Kosamattam Mathew K Cherian Financiers Private Limited. Our Promoter Directors devote some of their time and resources to Kosamattam Mathew K Cherian Financiers Private Limited. There can be no assurance that our Promoter Directors' role in the Group Company does not present any conflicts of interest or potential conflicts of interest.

Further, Kosamattam Mathew K Cherian Financiers Private Limited is registered as a non-banking financial institution and could offer services that are related to our business, which could lead to potential conflicts of interest. Further there is no non-compete agreement between our Company and Kosamattam Mathew K Cherian Financiers Private Limited. The memorandum of association of Kosamattam Mathew K Cherian Financiers Private Limited entitles it to undertake and carry out businesses that are similar or related to our business. There can be no assurance that Kosamattam Mathew K Cherian Financiers Private Limited will not provide comparable services, expand their presence or acquire interests in competing ventures in the locations in which we operate. As a result, a conflict of interest may occur between our business and the business of Kosamattam Mathew K Cherian Financiers Private Limited which could have an adverse effect on our operations.

Additionally, on February 26, 2018, the Financial Intelligence Unit - India, Ministry of Finance categorised Kosamattam Mathew K Cherian Financiers Private Limited as a 'High Risk Financial Institution' on account of non-compliance with the Prevention of Money Laundering Act, 2002 and the rules made thereunder in relation to not undertaking registration of principal officer as on January 31, 2018.

Pursuant to a board resolution dated December 8, 2015, the Board of Directors of our Company decided to merge Kosamattam Mathew K Cherian Financiers Private Limited with our Company, subject to the receipt of an in-principle approval from the RBI. The RBI vide a letter dated May 4, 2016 sought relevant information pertaining to the merger, to which our Company responded vide a detailed reply dated May 6, 2016. Subsequently, the RBI sought additional information vide a letter dated June 2, 2016 which were addressed by our Company vide a reply dated June 14, 2016. Subsequently, the Board of Directors of our Company in their meeting held on August 6, 2016, approved the merger of Kosamattam Mathew K. Cherian Financiers Private Limited with our Company by adopting the draft scheme of merger subject to the approval from the shareholders of our Company and the creditors, respectively and also for due submission to the High Court of Kerala and the RBI. The RBI vide its letter dated October 4, 2016 has accorded its in-principle approval to the proposed merger, subject to approval from the High Court of Kerala.

Subsequently, with effect from December 15, 2016, the Ministry of Corporate Affairs notified the relevant provisions of the Companies Act, 2013 constituting the NCLT and empowering it to enforce the provisions pertaining to mergers and amalgamations. Therefore, our Company was required to approach the National Company Law Tribunal, Chennai for effectuating the scheme of merger. The Board of Directors of our Company in their meeting held on February 8, 2017, approved the revised scheme of merger which would be effective from April 1, 2016 being the appointed date and includes a share exchange ratio of 2:1, i.e., for everyone share held by the shareholders of Kosamattam Mathew K. Cherian Financiers Private Limited, our Company shall allot two Equity Shares of our Company. Our Company has filed draft scheme of merger before the National Company Law Tribunal at Chennai ("**Tribunal**") on February 27, 2017. The Tribunal vide an order dated October 10, 2017 directed our Company to convene and conduct meetings of members and creditors in accordance with Section 230(1) and 230(3) of the Companies Act. The meetings of the members and creditors were duly convened on November 29, 2017 and November 30, 2017. Subsequently, our Company filed the petition for sanction of the scheme before the Tribunal, by way of Form No. CAA.5 dated December 11, 2017. There can be no guarantee that the Tribunal shall approve the proposed scheme of merger. In case our Company is unable to secure the requisite approvals, the proposed scheme may not be effectuated and may potentially affect our long-term operations.

8. *Our Company was unable to trace certain secretarial records, including records pertaining to the allotment of Equity Shares acquired by our past shareholders prior to August 2004.*

We have been unable to locate the copies of certain of our secretarial records, i.e. prescribed forms filed by us with the Registrar of Companies, including, among others, in respect of the allotment of Equity Shares

from incorporation until August 2004. While we believe that these forms were duly filed on a timely basis, we have not been able to obtain copies of these documents, including from the Registrar of Companies. We cannot assure you that we will not be subject to any adverse action by a competent regulatory authority in this regard.

9. *A major part of our branch network is concentrated in southern India and we derive majority of our revenue from southern India. Any breakdown of services in these areas could have a material and adverse effect on our results of operations and financial conditions.*

We derive majority of our revenue from our 867 branches situated in southern India out of 892 of our total branches. As a result, we are exposed to risks including any change in policies relating to these states, any localised social unrest, any natural disaster and any event or development which could make business in such states less economically beneficial. Any such risk, if materialises, could have a material adverse effect on the business, financial position and results of operations of our Company. For further details of our branch network within India, please refer to the chapter titled “*Our Business - Branch Network*” on page 85.

10. *Our business is capital intensive and any disruption or restrictions in raising financial resources would have a material adverse effect on our liquidity and financial condition.*

Our liquidity and ongoing profitability is largely dependent upon our timely access to and the costs associated in raising resources. Our funding requirements historically have been met from a combination of borrowings such as working capital limits from banks, and issuance of secured and unsecured redeemable non-convertible debentures on private placement basis and Public Issue of secured and unsecured redeemable non-convertible debentures. Thus, our business depends and will continue to depend on our ability to access diversified low-cost funding sources.

Our ability to raise funds on acceptable terms and at competitive rates continues to depend on various factors including our credit ratings, the regulatory environment and policy initiatives in India, developments in the international markets affecting the Indian economy, investors' and/or lenders' perception of demand for debt and equity securities of NBFCs, and our current and future results of operations and financial condition.

The crisis in the global credit market that began in mid-2007 destabilised the then prevailing lending model by banks and financial institutions. The capital and lending markets were highly volatile and access to liquidity had been significantly reduced. In addition, it became more difficult to renew loans and facilities as many potential lenders and counterparties also faced liquidity and capital concerns as a result of the stress in the financial markets. If any event of similar nature and magnitude occurs again in the future, it may result in increased borrowing costs and difficulty in accessing debt in a cost-effective manner. Moreover, we are a NBFC-ND-SI, and do not have access to public deposits.

The RBI has issued guidelines DBOD.BP.BC.No. 106/21.04.172/2011-12 on May 18, 2012 whereby it has instructed banks to (i) reduce their regulatory exposure on a single NBFC having gold loans to the extent of 50.00% or more of its financial assets from 10.00% to 7.50% of their capital funds; and (ii) have an internal sub-limit as decided by the boards of the respective banks on their aggregate exposure to all such NBFCs having gold loans to the extent of 50% or more of their financial assets, taken together, which sub-limit should be within the internal limits fixed by banks for their aggregate exposure to all NBFCs taken together.

The RBI vide its circular RBI/2014-15/475 DNBS (PD) CC No.021/03.10.001/2014-15 dated February 20, 2015 issued certain guidelines with respect to raising money through private placement by NBFCs in the form of non-convertible debentures. These guidelines include restrictions on the minimum subscription amount for a single investor at ₹20,000, the issuance of private placement of NCDs shall be in two separate categories, those with a maximum subscription of less than ₹1 crore and those with a minimum subscription of ₹1 crore and above, the restriction of number of investors in an issue to 200 investors for a maximum subscription of less than ₹1 crore which shall be fully secured, there is no limit on the number of subscribers in respect of issuances with a minimum subscription of ₹1 crore and above while the option to create security in favour of subscribers will be with the issuers and such unsecured debentures shall not be treated as public deposits, restriction on NBFCs for issuing debentures only for deployment of funds on its own balance sheet and not to facilitate resource requests of group entities/parent company/associates, prohibition on providing loan against its own debentures, etc. This has resulted in limiting the Company's ability to raise fresh debentures on private placement basis.

A significant portion of our debt matures each year. Out of the total amount of our outstanding NCDs, ₹1,55,409.77 lakhs, issued by our Company as of September 30, 2017, NCDs amounting to ₹33,026.03 lakhs will mature during the next 12 months. In order to retire these instruments, we either will need to refinance this debt, which could be difficult in the event of volatility in the credit markets, or raise equity capital or generate sufficient cash to retire the debt.

Changes in economic and financial conditions or continuing lack of liquidity in the market could make it difficult for us to access funds at competitive rates. As a NBFC, we also face certain restrictions on our ability to raise money from international markets, which may further constrain our ability to raise funds at attractive rates.

Any disruption in our primary funding sources at competitive costs would have a material adverse effect on our liquidity and financial condition.

11. Our financial performance is primarily dependent on interest rate risk. If we are unable to manage interest rate risk in the future it could have an adverse effect on our net interest margin, thereby adversely affecting business and financial condition of our company.

Our results of operations are substantially dependent upon the level of our Net Interest Margins. Income from operations is the largest component of our total income, and constituted 99.26%, 98.90% and 99.54% of our total income for Financial Years ended March 31, 2017, March 31, 2016 and March 31, 2015, respectively. Interest rates are sensitive to many factors beyond our control, including the RBI's monetary policies, domestic and international economic and political conditions and other factors.

Over the last several years, the Government of India has substantially deregulated the financial sector. As a result, interest rates are now primarily determined by the market, which has increased the interest rate risk exposure of all banks and financial intermediaries in India, including us.

Our policy is to attempt to balance the proportion of our interest earning assets, which bear fixed interest rates, with interest bearing liabilities. A significant portion of our liabilities, such as our NCDs carry fixed rates of interest. Moreover, we do not hedge our exposure to interest rate changes. We cannot assure you that we can adequately manage our interest rate risk in the future or can effectively balance the proportion of our fixed rate loan assets and liabilities. Further, changes in interest rates could affect the interest rates charged on interest earning assets and the interest rates paid on interest bearing liabilities in different ways. Thus, our results of operations could be affected by changes in interest rates and the timing of any re-pricing of our liabilities compared with the re-pricing of our assets.

In a rising interest rate environment, if the yield on our interest earning assets does not increase at the same time or to the same extent as our cost of funds, or, in a declining interest rate environment, if our cost of funds does not decline at the same time or to the same extent as the yield on our interest earning assets, our net interest income and net interest margin would be adversely affected.

12. We have had negative net cash flows from our operating, investing and financing activities in the recent fiscal years. Any negative cash flows in the future may adversely affect our results of operations and financial condition.

We have had negative net cash flows from our operating, investing and financing activities in the last three fiscal years, the details of which are summarised below:

<i>(in ₹ lakhs)</i>			
Particulars	Fiscal 2017	Fiscal 2016	Fiscal 2015
Net cash generated from/ (used in) operating activities	(6,362.66)	5,216.20	(192.37)
Net cash generated from/ (used in) investing activities	(2,634.40)	7,828.09	(16,356.59)
Net cash generated from/ (used in) financing activities	7,476.30	(24,396.54)	26,214.00

Any negative cash flows in the future may adversely affect our results of operations and financial condition. For further details, please see the sections titled "Financial Statements" on page 107.

13. *We face increasing competition in our business which may result in declining interest margins. If we are unable to compete successfully, our market share may also decline.*

Our principal business is providing Gold Loan to customers in India secured by gold jewellery. Historically, the Gold Loan industry in India has been largely unorganised and dominated by local jewellery pawn shops and money lenders, with little involvement from public sector or private sector banks. Gold Loan financing was availed predominantly by lower income group customers with limited or no access to other forms of credit, however, such income group has gained increased access to capital through organised and unorganised money lenders, which has increased our exposure to competition. The demand for Gold Loans has also increased due to relatively lower and affordable interest rates, increased need for urgent borrowing or bridge financing requirements, the need for liquidity for assets held in gold and increased awareness and acceptance of Gold Loan financing.

All of these factors have resulted in increased competition from other lenders in the Gold Loan industry, including commercial banks and other NBFCs, who also have access to funding from customers' savings and current deposits. We are reliant on higher cost loans and debentures for our funding requirements, which may reduce our margins compared to competitors. Our ability to compete effectively will depend, to some extent, on our ability to raise low cost funding in the future. If we are unable to compete effectively with other participants in the Gold Loan industry, our business, financial condition and results of operations may be adversely affected. Furthermore, as a result of increased competition in the Gold Loan industry, Gold Loans are becoming increasingly standardised. Variable interest rates, variable payment terms and waiver of processing fees are also becoming increasingly common.

In our microfinance business, we face competition from other NBFCs, microfinance companies as well as both commercial and small finance banks. In addition, the RBI has set out guidelines applicable to microfinance institutions which restrict the number of microfinance institutions that can extend loans to the same borrower and also limit the maximum amount of loan that can be extended. The presence of microfinance institutions in India is not uniform and certain regions have a concentration of a large number of microfinance institutions while there are regions which have very few and even no microfinance institution presence. In any particular region, the level of competition depends on the number of microfinance institutions that operate in such area. In addition, our target customers also borrow from money lenders and non-institutional lenders which may lend at higher rates of interest.

Our ability to compete effectively will depend, to an extent, on our ability to raise low-cost funding in the future as well as our ability to maintain or decrease our operating expenses by increasing operational efficiencies and managing credit costs. As a result of increased competition in the various sectors we operate in, products in our industry have become increasingly standardized and variable interest rate and payment terms and lower processing fees are becoming increasingly common across our products. There can be no assurance that we will be able to effectively address these or other finance industry trends or compete effectively with new and existing commercial banks, NBFCs, payment banks, other small finance banks and other financial intermediaries that operate across our various financing products.

In addition, the government has issued schemes such as Pradhan Mantri Jan-Dhan Yojana to ensure access to financial services in an affordable manner. Further, public sector banks as well as existing private sector banks, have an extensive customer and depositor base, larger branch networks, and in case of public sector banks, Government support for capital augmentation, due to which they may enjoy corresponding economies of scale and greater access to low-cost capital, and accordingly, we may not be able to compete with them. An inability to effectively address such competition may adversely affect our market share, business prospects, results of operations and financial condition.

14. *Volatility in the market price of gold may adversely affect our financial condition, cash flows and results of operations.*

We extend loans secured mostly by household gold jewellery. A sustained decrease in the market price of gold could cause a corresponding decrease in new Gold Loans in our loan portfolio and, as a result, our interest income. In addition, customers may not repay their loans and the gold jewellery securing the loans may have decreased significantly in value, resulting in losses which we may not be able to support. The impact on our financial position and results of operations of a hypothetical decrease in gold values cannot be reasonably estimated because the market and competitive response to changes in gold values is not pre-

determinable.

15. We may not be able to realise the full value of our pledged gold, which exposes us to potential loss.

We may not be able to realise the full value of our pledged gold, due to, among other things, defects in the quality of gold or wastage that may occur when melting gold jewellery into gold bars. We have in place an extensive internal policy on determining the quality of gold prior to disbursement of the Gold Loan. However, we cannot assure that methods followed by us are fool proof and the impurity levels in the gold can be accurately assessed.

In the case of a default, amongst others we may auction the pledged gold in accordance with our auction policy. We cannot assure you that we will be able to auction such pledged gold jewellery at prices sufficient to cover the amounts under default. Moreover, there may be delays associated with the auction process or other processes undertaken by us to recover the amount due to us. Any such failure to recover the expected value of pledged gold could expose us to a potential loss and which could adversely affect our financial condition and results of operations.

16. We may not be able to successfully sustain our growth strategy. Inability to effectively manage our growth and related issues could materially and adversely affect our business and impact our future financial performance.

We have expanded our operations in the last three years from 880 branches as on January 31, 2015 to 892 branches as on January 31, 2018. We have experienced considerable growth in terms of our loan portfolio from ₹98,864.20 lakhs as on March 31, 2013 to ₹1,92,210.43 lakhs as on March 31, 2017. Our income from operations increased from ₹23,358.44 lakhs in the Financial Year ended March 31, 2013 to ₹34,963.20 lakhs in the Financial Year ended March 31, 2017 thereby achieving compounded annual growth rate (“CAGR”) of 10.40%. In this same period, the loan book increased from ₹98,864.20 lakhs for the Financial Year ended March 31, 2013 to ₹1,92,210.43 lakhs for the Financial Year ended March 31, 2017 at a CAGR of 18.08%. Our income from operations and loan book for financial year ended March 31, 2017 is ₹34,963.20 lakhs and ₹1,92,210.43 lakhs, respectively.

Our growth strategy includes growing our loan book, expanding network of branches and expanding the range of products and services. We cannot assure you that we will be able to execute our growth strategy successfully or continue to achieve or grow at the levels of revenue earned in recent years, or that we will be able to expand further our loan book. Furthermore, there may not be sufficient demand for our services or they may not generate sufficient revenues relative to the costs associated with offering such services. Even if we were able to introduce new services successfully, there can be no assurance that we will be able to achieve our intended return on such investments.

Further principal component of our strategy is to continue to grow by expanding the size and geographical scope of our businesses. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. It also includes undertaking permission from various authorities, including RBI and various regulatory compliances. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure.

17. If we are not able to control the level of non-performing assets in our portfolio, the overall quality of our loan portfolio may deteriorate and our results of operations may be adversely affected.

We may not be successful in our efforts to improve collections and/or enforce the security interest on the gold collateral on existing as well as future non-performing assets. Moreover, as our loan portfolio increases, we may experience greater defaults in principal and/or interest repayments. Thus, if we are not able to control our level of non-performing assets, the overall quality of our loan portfolio may deteriorate and our results of operations may be adversely affected. Our gross NPAs as of the six-month period ended September 30, 2017 and Financial Years ended March 31, 2017, March 31, 2016, March 31, 2015, March 31, 2014 and March 31, 2013, was ₹1,302.94 lakhs, ₹1,089.70 lakhs, ₹666.98 lakhs, ₹631.97 lakhs, ₹172.15 lakhs and ₹305.83 lakhs, respectively.

The RBI Master Directions prescribe the provisioning required in respect of our outstanding loan portfolio.

Should the overall credit quality of our loan portfolio deteriorate, the current level of our provisions may not be adequate to cover further increases in the amount of our non-performing assets. Furthermore, although we believe that our total provision will be adequate to cover all known losses in our asset portfolio, our current provisions may not be adequate when compared to the loan portfolios of other financial institutions. Moreover, there also can be no assurance that there will be no further deterioration in our provisioning coverage as a percentage of gross non-performing assets or otherwise, or that the percentage of non-performing assets that we will be able to recover will be similar to our past experience of recoveries of non-performing assets. In the event of any further increase in our non-performing asset portfolio, there could be an even greater, adverse impact on our results of operations.

18. *Our ability to lend against the collateral of gold jewellery has been restricted on account of guidelines issued by RBI, which may have a negative impact on our business and results of operation.*

RBI vide the Master Directions has stipulated all NBFCs to maintain a loan to value (LTV) ratio not exceeding 75% for loans granted against the collateral of gold jewellery and further prohibits lending against bullion/primary gold and gold coins. This notification will limit our ability to provide loan on the collateral of gold jewellery and thereby putting us at a disadvantage vis-à-vis unregulated money lenders offering similar products. Further, RBI in the Master Directions, has mandated NBFCs primarily engaged in lending against gold jewellery (such loans comprising 50% or more of their financial assets) to maintain a minimum Tier 1 capital of 12%. Such restrictions imposed by RBI may erode our margins, impact our growth and business prospects.

RBI in the Master Directions, further tightened the norms for lending against the security of gold ornaments by pegging the maximum lendable value (LTV) to 30 day moving average closing price of 22 carat gold quoted by India Bullion and Jewellers Association Limited (formerly known as Bombay Bullion Association Limited).

19. *We are subject to certain restrictive covenants in our loan documents, which may restrict our operations and ability to grow and may adversely affect our business.*

There are restrictive covenants in the agreements we have entered into with our lender. These restrictive covenants require us to seek the prior permission of these banks/financial institutions for various activities, including, amongst others, to declare dividend, for any change in the management/constitution, takeovers/mergers etc. or any expansion, new project/investment/acquiring assets under lease/enter into borrowing arrangements, to undertake any new project, or diversification, modernisation, amend or modify its Memorandum and Articles of Association/Bye Laws/Trust Deeds etc. For details of these restrictive covenants, see the chapter titled “*Financial Indebtedness*” beginning on page 109.

20. *We are subjected to supervision and regulation by the RBI as a systemically important NBFC, and changes in RBI's regulations governing us could adversely affect our business.*

We are subject to the RBI's guidelines on financial regulation of NBFCs, including capital adequacy, exposure and other prudential norms. The RBI also regulates the credit flow by banks to NBFCs and provides guidelines to commercial banks with respect to their investment and credit exposure norms for lending to NBFCs. The RBI's regulations of NBFCs could change in the future which may require us to restructure our activities, incur additional cost or could otherwise adversely affect our business and our financial performance. Through the Master Directions, RBI has amended the regulatory framework governing NBFCs to address concerns pertaining to risks, regulatory gaps and arbitrage arising from differential regulations and aims to harmonise and simplify regulations to facilitate a smoother compliance culture among NBFCs.

Moreover, under the amendment, the threshold for defining systemic significance for NBFCs-ND has been revised in the light of the overall increase in the growth of the NBFC sector. NBFCs-ND-SI will henceforth be those NBFCs-ND which have asset size of ₹50,000 lakhs and above as per the last audited balance sheet. Moreover, as per the requirements of the Master Directions, all NBFCs-ND with assets of ₹50,000 lakhs and above, irrespective of whether they have accessed public funds or not, shall comply with prudential requirements as applicable to NBFCs-ND-SI. We cannot assure you that the Master Directions and its applicability to us will not have a material and adverse effect on our future financial conditions and results of operations.

Even though the RBI, has not provided for any restriction on interest rates that can be charged by non-deposit

taking NBFCs, there can be no assurance that the RBI and/or the Government will not implement regulations or policies, including policies or regulations or legal interpretations of existing regulations, relating to or affecting interest rates, taxation, inflation or exchange controls, or otherwise take action, that could have an adverse effect on non-deposit taking NBFCs. In addition, there can be no assurance that any changes in the laws and regulations relative to the Indian financial services industry will not adversely impact our business.

21. We may be subject to regulations in respect of provisioning for non-performing assets. If such provisions are not sufficient to provide adequate cover for loan losses that may occur, this could have an adverse effect on our financial condition, liquidity and results of operations.

RBI guidelines prescribe the provisioning required in respect of our outstanding loan portfolio. These provisioning requirements may require us to reserve lower amounts than the provisioning requirements applicable to financial institutions and banks in other countries. The provisioning requirements may also require the exercise of subjective judgments of management. The RBI vide the Master Directions provides for the regulatory framework governing NBFCs pertaining to provision for standard assets. The requirement to make a provision for standard assets has been set out in a phased manner over a period of three years, i.e., 0.30% by the end of March 2016, 0.35% by the end of March 2017 and 0.40% by the end of March 2018.

There are multiple factors that affect the level of NPAs in our Company. Prominent among them are fall in value of gold, increase in the LTV ratio for gold loan etc.

The level of our provisions may not be adequate to cover further increases in the amount of our nonperforming assets or a decrease in the value of the underlying gold collateral. If such provisions are not sufficient to provide adequate cover for loan losses that may occur, or if we are required to increase our provisions, this could have an adverse effect on our financial condition, liquidity and results of operations and may require us to raise additional capital.

22. Microfinance loans are unsecured and are susceptible to certain operational and credit risks which may result in increased levels of NPAs.

As of September 30, 2017, our microfinance AUM was ₹869.38 lacs, representing 0.39% of our aggregate AUM as of such date. Our microfinance customers typically belong to the economically weaker sections and are diverse in nature, which include customers involved in income generating business activities, with limited sources of income, savings and credit records, and are therefore unable to provide us with any collateral or security for their loans. Such customers are at times unable to or may not provide us with accurate information about themselves which is required by us in connection with loans. Further, in case of emergencies like death of the borrower or the borrower's nominee, our microfinance borrowers are given a holiday period from payment of instalment on the outstanding borrowings which is later settled against payment received from the insurance companies.

In our microfinance business, we rely on non-traditional guarantee mechanisms rather than any tangible assets as security collateral. Our microfinance business involves a joint liability mechanism whereby borrowers form a joint liability group and provide guarantees for loans obtained by each member of such group. There can however be no assurance that such joint liability arrangements will ensure repayment by the other members of the joint liability group in the event of default by any one of them. Such joint liability arrangements are likely to fail if there is no meaningful personal relationship or bond among members of such group, if inadequate risk management procedures have been employed to verify the group members and their ability to repay such loans, or as a result of adverse external factors such as natural calamities and forced migration.

As a result, our micro finance customers potentially present a higher risk of loss in case of a credit default compared to that of customers in other asset-backed financing products. In addition, repayment of microfinance loans are susceptible to various political and social risks, including any adverse publicity relating to the microfinance sector accessing capital markets, public criticism of the microfinance sector, the introduction of a stringent regulatory regime, and/or religious beliefs relating to loans and interest payments, which adversely affect repayment by our customers and may have a material and adverse effect on our business prospects and future financial performance.

There can be no assurance that we will be able to maintain our current levels of NPAs. In addition, it is difficult to accurately predict credit losses, and there can be no assurance that our monitoring and risk management

procedures will succeed in effectively predicting such losses or that our loan loss reserves will be sufficient to cover any such actual losses. As a result of the uncertain financial and social circumstances of our microfinance customers and the higher risks associated with lending to such customers, we may experience increased levels of NPAs and we may be required to make related provisions and write-offs that could have a material and adverse effect on our business prospects and financial performance.

23. *Our microfinance business involves transactions with relatively high-risk borrowers that typically do not have access to formal banking channels, and high levels of customer defaults could adversely affect our business, results of operations and financial condition.*

Our microfinance business involves lending money to smaller, relatively low-income entrepreneurs and individuals who have limited access or no access to formal banking channels, and therefore may not have any credit history and as a result we are more vulnerable to customer default risks including default or delay in repayment of principal or interest on our loans.

Some of our customers, especially the first-time borrowers, may not have any documented credit history, may have limited formal education, and are able to furnish very limited information for us to be able to assess their creditworthiness accurately. Consequently, we may not have past data on the customer's borrowing behaviour. In addition, we may not receive updated information regarding any change in the financial condition of our customers or may receive inaccurate or incomplete information as a result of any fraudulent misrepresentation on the part of our customers. It is therefore difficult to carry out credit risk analysis on our clients. Although we believe that our risk management controls are stringently applied, there can be no assurance that they will be sufficient or that additional risk management strategies for our customers will not be required.

Further, our customers may default on their obligations as a result of various factors including bankruptcy, lack of liquidity and / or failure of the business or commercial venture in relation to which such borrowings were sanctioned. Although our microfinance business operates through a system of joint liability, we may still be exposed to defaults in payment, which we may not be able to recover in full. If our borrowers fail to repay loans in a timely manner or at all, our financial condition and results of operations will be adversely impacted.

24. *Our ability to borrow from various banks may be restricted on account of guidelines issued by the RBI, imposing restrictions on banks in relation to their exposure to NBFCs. Any limitation on our ability to borrow from such banks may increase our cost of borrowing, which could adversely impact our growth, business and financial condition.*

Under RBI Master Circular DBR.BP.BC.No.5/21.04.172/2015-16 on bank finance to NBFCs issued on July 1, 2015, the exposure (both lending and investment, including off balance sheet exposures) of a bank to a single NBFC engaged in lending against collateral of gold jewellery (i.e. such loans comprising 50% or more of its financial assets) should not exceed 7.5%, of its capital funds. Banks may, however, assume exposures on a single NBFC up to 12.5%, of their capital funds, provided the exposure in excess of 7.5% is on account of funds on-lent by the NBFC to the infrastructure sector. Further, banks may also consider fixing internal limits for their aggregate exposure to all NBFCs put together and should include internal sub-limit to all NBFCs providing Gold Loans (i.e. such loans comprising 50% or more of their financial assets), including us. This limits the exposure that banks may have on NBFCs such as us, which may restrict our ability to borrow from such banks and may increase our cost of borrowing, which could adversely impact our growth, business and financial condition.

25. *Our Gold Loans are due within nine months of disbursement, and a failure to disburse new loans may result in a reduction of our loan portfolio and a corresponding decrease in our interest income.*

The Gold Loans we offer are due within a period of nine months of disbursement. The relatively short-term nature of our loans means that we are not assured of long-term interest income streams compared to businesses that offer loans with longer terms. In addition, our existing customers may not obtain new loans from us upon maturity of their existing loans, particularly if competition increases. The short-term nature of our loan products and the potential instability of our interest income could materially and adversely affect our results of operations and financial position.

26. *Inaccurate appraisal of gold by our personnel may adversely affect our gold loan business and financial condition.*

The accurate appraisal of pledged gold is a significant factor in the successful operation of our business and such appraisal requires a skilled and reliable workforce. Inaccurate appraisal of gold by our workforce may result in gold being overvalued and pledged for a loan that is higher in value than the gold's actual value, which could adversely affect our reputation and business. Further, we are subject to the risk that our gold appraisers may engage in fraud regarding their estimation of the value of pledged gold. Any such inaccuracies or fraud in relation to our appraisal of gold may adversely affect our reputation, business and financial condition.

27. *Exchange rate fluctuations may adversely affect our results of operations.*

We provide foreign exchange services to our customers. Accordingly, we are exposed to risks associated with foreign exchange fluctuation. Any adverse fluctuation in foreign exchange rates could affect our results of operations.

28. *Our branches are vulnerable to theft and burglary. While we are insured against the risk of burglary arising from our business, such insurance may not be sufficient to fully cover the losses we suffer and this may result in adverse effect on our financial condition and results of operations.*

Storage of pledged gold jewellery as part of our business entails the risk of theft/burglary and resulting loss to our reputation and business. The short tenure of the loans advanced by us and our practice of processing loan repayments within short timelines require us to store pledged gold on our premises at all points in time. With regard to cases of theft/burglaries, we may not be able to recover the entire amount of the loss suffered and may receive only a partial payment of the insurance claim. While we are insured against the risk of burglary arising from our business, such insurance may not be sufficient to fully cover the losses we suffer. Further, the actual recovery of the insured amount from the insurer requires the undertaking of certain procedures, and any delay in recovery could adversely affect our reputation and results of operation.

29. *The insurance coverage taken by us may not be adequate to protect against certain business risks. This may adversely affect our financial condition and result of operations.*

Operating and managing a Gold Loan business involves many risks that may adversely affect our operations and the availability of insurance is therefore important to our operations. We believe that our insurance coverage is adequate to cover us. However, to the extent that any uninsured risks materialise or if it fails to effectively cover any risks, we could be exposed to substantial costs and losses that would adversely affect our financial condition. In addition, we cannot be certain that the coverage will be available in sufficient amounts to cover one or more large claims or that our insurers will not disclaim coverage as to any particular claim or claims. Occurrence of any such situation could adversely affect our financial condition and results of operations.

30. *Our entire customer base comprises individual borrowers, who generally are more likely to be affected by declining economic conditions than larger corporate borrowers.*

A majority of our customer base belongs to the low to medium income group. Furthermore, unlike many developed economies, a nationwide credit bureau has only recently become operational in India, so there is less financial information available about individuals, particularly our focus customer segment of the low to medium income group. It is therefore difficult to carry out precise credit risk analyses on our customers. While we follow certain procedures to evaluate the credit profile of our customers before we sanction a loan, we generally rely on the quality of the pledged gold rather than on a stringent analysis of the credit profile of our customers. Although we believe that our risk management controls are sufficient, we cannot be certain that they will continue to be sufficient or that additional risk management policies for individual borrowers will not be required. Failure to maintain sufficient credit assessment policies, particularly for individual borrowers, could adversely affect our loan portfolio, which could in turn have an adverse effect on our financial condition, cash flows and results of operations.

31. *We strive to attract, retain and motivate key employees, and our failure to do so could adversely affect our business. Failure to hire key executives or employees could have a significant impact on our operations.*

While we strive to attract, train, motivate and retain highly skilled employees, especially branch managers and gold assessment technical personnel, any inability on our part to hire additional personnel or retain existing qualified personnel may impair our ability to expand our business could lead to a decline of our revenue. Hiring and retaining qualified and skilled managers and sales representatives are critical to our future, and competition for experienced employees in the gold loan industry is intense. In addition, we may not be able to hire and retain enough skilled and experienced employees to replace those who leave, or may not be able to re-deploy and retain our employees to keep pace with continuing changes in technology, evolving standards and changing customer preferences. The failure to hire key executives or employees or the loss of executives and key employees could have a significant impact on our operations.

32. *We are subject to the risk of fraud by our employees and customers. Our lending operations involve significant amounts of cash collection which may be susceptible to loss or misappropriation or fraud by our employees. Specifically, employees operating in remote areas may be susceptible to criminal elements which may adversely affect our business, operations and ability to recruit and retain employees*

We are exposed to the risk of fraud and other misconduct by employees and customers. While we carefully recruit all of our employees and screen all our employees who are responsible for disbursement of Gold Loans and custody of gold, there could be instances of fraud with respect to Gold Loans and cash related misappropriation by our employees. We are required to report cases of internal fraud to the RBI, which may take appropriate action. In the last year, our Company has filed a complaint and a FIR at Poyampalayam Police Station and Dhindugal Police Station, respectively. Further, our Company has registered an FIR against the branch manager of our Gudallur branch for fraud and misappropriation. We have also filed police complaints alleging fraud and misappropriation of gold by our employees in the past. We cannot guarantee you that such acts of fraud will not be committed in the future, and any such occurrence of fraud would adversely affect our reputation, business and results of operations.

Our lending and collection operations involve handling of significant amounts of cash, including collections of instalment repayments in cash which is the norm in the finance industry. Large amounts of cash collection expose us to the risk of loss, fraud, misappropriation or unauthorised transactions by our employees responsible for dealing with such cash collections. While we obtain insurance, coverage including fidelity coverage and coverage for cash in safes and in transit, and undertake various measures to detect and prevent any unauthorized transactions, fraud or misappropriation by our employees, these measures may not be sufficient to prevent or deter such activities in all cases, which may adversely affect our business operations and financial condition. In addition, we may be subject to regulatory or other proceedings in connection with any such unauthorised transaction, fraud or misappropriation by our agents or employees, which could adversely affect our goodwill, business prospects and future financial performance.

Further, our employees operating in remote areas may be particularly susceptible to criminal elements as they are involved in cash collection and transportation due to lack of local banking facilities. In the event of any such adverse incident our ability to continue our operations in such areas will be adversely affected and our employee recruitment and retention efforts may be affected, thereby affecting our expansion plans. In addition, if we determine that certain areas of India pose a significantly higher risk of crime or political strife and instability, our ability to operate in such areas will be adversely affected.

33. *We are subject to the risk of unknowingly receiving stolen goods as collateral from customers which may result in loss of collateral for the loan disbursed*

We have in place a policy in place to satisfy ownership of the gold jewellery and have taken adequate steps to ensure that the KYC guidelines stipulated by RBI are followed and due diligence of the customer is undertaken prior to the disbursement of loans. However, in the event that we unknowingly receive stolen goods as collateral from a customer, the goods can be seized by authorities. Once seized by the authorities, gold items will be stored in court storage facilities without a surety arrangement. No recourse is generally available to our Company in the event of such seizure, except the recovery of the loss from the customer. Any seizure of the gold ornaments by the authorities shall result in us losing the collateral for the loan disbursed and could adversely affect our business and results of operations.

34. *System failures or inadequacy and security breaches in computer systems may adversely affect our operations and result in financial loss, disruption of our businesses, regulatory intervention or damage to our reputation.*

Our business is increasingly dependent on our ability to process, on a daily basis, a large number of transactions. Through our information technology systems, we manage our operations, market to our target customers, and monitor and control risks. We are dependent upon the IT software for effective monitoring & management, and any failure in our IT systems or loss of connectivity or any loss of data arising from such failure can impact our business and results of operations.

35. *We have entered into, and will continue to enter into, related party transactions.*

We have entered into transactions with several related parties, including our Promoters Directors and Group Companies. We cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties. Furthermore, it is likely that we will enter into related party transactions in the future. The transactions we have entered into and any future transactions with our related parties could potentially involve conflicts of interest. For example, the Company has entered into an agreement with Mathew K. Cherian, Managing Director of the Company, for purchase of landed property amounting to ₹2,600 lakhs based on the valuation report dated June 10, 2014, received from a bank approved valuer. As required under Companies Act, Company has passed a special resolution before the purchase of landed property from Mr. Mathew K. Cherian. For details in relation to transactions with related parties as per Accounting Standard 18 issued under the Companies Accounting Standard Rules entered into by us, see “*Transactions with Related Parties - Financial Information*” beginning on page F-42 of this Draft Prospectus.

36. *Our internal procedures, on which we rely for obtaining information on our customers and loan collateral, may be deficient and result in business losses.*

We rely on our internal procedures for obtaining information relating to our customers and the loan collateral provided. In the event of lapses or deficiencies in our procedures or in their implementation, we may be subject to business or operational risk. For example, in the event that we unknowingly receive stolen goods as collateral from a customer, the goods can be seized by authorities. Once seized by the authorities, gold items will be stored in court storage facilities without a surety arrangement. No recourse will generally be available to the Company in the event of such seizure, except the recovery of the loss from the customer.

37. *Our inability to open new branches at correct locations may adversely affect our business.*

Our business is dependent on our ability to service and support our customers from proximate locations and thereby giving our customers easy access to our services. Further, it is vital for us to be present in key locations for sourcing business as we depend on these branches to earn revenue. Thus, any inability on our part to open new branches at correct locations may adversely affect our business and results of operations.

38. *Our inability to obtain, renew or maintain our statutory and regulatory permits and approvals required to operate our business may have a material adverse effect on our business, financial condition and results of operations.*

NBFCs in India are subject to strict regulations and supervision by the RBI. In addition to the numerous conditions required for the registration as a NBFC with the RBI, we are required to maintain certain statutory and regulatory permits and approvals for our business. In the future, we will be required to renew such permits and approvals and obtain new permits and approvals for any proposed operations. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Failure on our part to renew, maintain or obtain the required permits or approvals may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations.

In addition, our branches are required to be registered under the relevant shops and establishments laws of the states in which they are located. The shops and establishment laws regulate various employment conditions, including working hours, holidays and leave and overtime compensation. Some of our branches have not applied for such registration while other branches still have applications for registration pending. If we fail to obtain or retain any of these approvals or licenses, or renewals thereof, in a timely manner, or at

all, our business may be adversely affected. If we fail to comply, or a regulator claims we have not complied, with any of these conditions, our certificate of registration may be suspended or cancelled and we shall not be able to carry on such activities.

39. All our branch premises, except three branches are acquired on lease. Any termination of arrangements for lease of our branches or our failure to renew the same in a favourable, timely manner, could adversely affect our business and results of operations.

As on January 31, 2018, we had 892 branches in eight states and one union territory. Except three branches which are owned by us, the remaining are located on leased premises. If any of the owners of these premises does not renew an agreement under which we occupy the premises, attempts to evict us or seeks to renew an agreement on terms and conditions non-acceptable to us, we may suffer a disruption in our operations or increased costs, or both, which may adversely affect our business and results of operations.

40. We are venturing into new business areas and the sustainability, effective management and failure of growth strategy could adversely affect our business and result of operations.

We are entering new businesses as part of our growth strategy. For example, we have recently received a corporate insurance agency license from IRDA under the Insurance Act, 1938 for acting as a corporate agent for the Life Insurance Corporation of India, which will enable us to market their life insurance plans. Further, our Company has also begun offering loans against collateral of commercial or residential property. Additionally, our Company successfully obtained registration as an AMFI Registered Mutual Fund Advisor (ARMFA), and was allotted a unique code-AMFI Registration Number (ARN) to undertake the business of a Mutual Fund Distributor and Commission Agent. Recently our Company has also started microfinancing activities. Additionally, our Company owns a parcel of agricultural land in Kattappana village, Udumpanchola Taluk, Idukki district, admeasuring 108.74 acres, through which our Company undertakes agricultural activity of cultivating cardamom. Also, our Company has entered into definitive agreements for installation of 4 windmill units at Ramakkalmedu, Idukki district of Kerala, which upon becoming operational shall be used to generate and supply power on a commercial basis.

We have little or no operating experience with such businesses, and you should consider the risks and difficulties we may encounter by entering into new lines of business. New businesses may require significant capital investments and commitments of time from our senior management, and there often is little or no prospect of earnings in a new business for several years. Moreover, there is no assurance any new business we develop or enter will commence in accordance with our timelines, if at all, which could result in additional costs and time commitments from our senior management. There also can be no assurance that our management will be able to develop the skills necessary to successfully manage these new business areas. Our inability to effectively manage any of the above issues could materially and adversely affect our business and impact our future financial performance.

41. This Draft Prospectus includes certain unaudited financial information, which has been subjected to limited review, in relation to our Company. Reliance on such information should, accordingly, be limited.

This Draft Prospectus includes certain unaudited financial information in relation to our Company, for the six-month period ended September 30, 2017 in respect of which the Statutory Auditors of our Company have issued the Limited Review Report. As this financial information, has been subject only to limited review as required under Regulation 52 (2) (a) of the SEBI Listing Regulations, and as described in the Standard on Review Engagements (“SRE”) 2410, “Review of Interim Financial Information Performed by the Independent Auditor of the Entity” issued by the Institute of Chartered Accountants of India, and not to an audit, any reliance by prospective investors on such unaudited financial information should accordingly, be limited. Moreover, our financial results for any given fiscal quarter or period, including the six-month period ended September 30, 2017, may not be directly comparable with our financial results for any full fiscal or for any other fiscal quarter or period. Accordingly, prospective investors to the Issue are advised to read such unaudited financial information in conjunction with the audited financial information provided elsewhere in this Draft Prospectus.

RISKS PERTAINING TO THIS ISSUE

- 42. *We are required to create a debenture redemption reserve equivalent to 25% of the value of the NCD offered through this Issue and we may not have access to adequate funds to redeem the full quantum of the NCDs at the closure of the redemption period.***

Regulation 16 of the SEBI Debt Regulations and Section 71 of the Companies Act 2013 states that any company that intends to issue debentures must create a debenture redemption reserve out of the profits of the company available for payment of dividend until the redemption of the debentures. Further, the Companies (Share Capital and Debentures) Rules, 2014 states that the Company shall create Debenture Redemption Reserve and 'the adequacy' of debenture redemption reserve will be 25% of the value of outstanding debentures issued through public issue as per present SEBI Debt Regulations. Accordingly, if we are unable to generate adequate profits, the debenture redemption reserve created by us may not be adequate to meet the 25% of the value of the outstanding NCDs, which may have a bearing on the timely redemption of the NCDs by our Company.

Further, our company is also required to, on or before the 30th day of April in each year, invest or deposit, as the case may be, a sum which shall not be less than fifteen percent, of the amount of the debentures maturing during the year ending on the 31st day of March of the next year, in any one or more of the following methods, namely: (i) in deposits with any scheduled bank, free from any charge or lien; (ii) in unencumbered securities of the Central Government or of any State Government; (iii) in unencumbered securities mentioned in sub-clauses (a) to (d) and (ee) of Section 20 of the Indian Trusts Act, 1882; (iv) in unencumbered bonds issued by any other company which is notified under sub-clause (f) of Section 20 of the Indian Trusts Act, 1882; (v) the amount invested or deposited as above shall not be used for any purpose other than for redemption of debentures maturing during the year referred above, provided that the amount remaining invested or deposited, as the case may be, shall not at any time fall below fifteen percent of the amount of the debentures maturing during the year ending on the 31st day of March of that year. If we do not generate adequate profits, we may not be able to maintain an adequate amount in this respect, for the NCDs issued pursuant to this Draft Prospectus, which may have a bearing on the timely redemption of the NCDs by our Company.

- 43. *Changes in interest rates may affect the price of our NCDs which frequently accompany inflation and/or a growing economy, are likely to have a negative effect on the price of our NCDs.***

All securities where a fixed rate of interest is offered, such as our NCDs, are subject to price risk. The price of such securities will vary inversely with changes in prevailing interest rates, i.e., when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of prevailing interest rates. Increased rates of interest, which frequently accompany inflation and/or a growing economy, are likely to have a negative effect on the price of our NCDs.

- 44. *You may not be able to recover, on a timely basis or at all, the full value of the outstanding amounts and/or the interest accrued thereon in connection with the NCDs.***

Our ability to pay interest accrued on the NCDs and/or the principal amount outstanding from time to time in connection therewith would be subject to various factors inter-alia including our financial condition, profitability and the general economic conditions in India and in the global financial markets. We cannot assure you that we would be able to repay the principal amount outstanding from time to time on the NCDs and/or the interest accrued thereon in a timely manner or at all.

- 45. *There is no assurance that the NCDs issued pursuant to this Issue will be listed on BSE Limited in a timely manner, or at all.***

In accordance with Indian law and practice, permission for listing and trading of the NCD issued pursuant to this issue will not be granted until after the NCDs have been issued and allotted. Approval for listing and trading will require all relevant documents authorising the issue of NCDs to be submitted. There could be a failure or delay in listing the NCDs in BSE.

- 46. *There may be no active market for the NCDs on the retail debt market/capital market segment of the BSE. As a result, the liquidity and market prices of the NCDs may fail to develop and may accordingly be adversely affected.***

There can be no assurance that an active market for the NCDs will develop. If an active market for the NCDs fails to develop or be sustained, the liquidity and market prices of the NCDs may be adversely affected. The market price of the NCDs would depend on various factors inter alia including (i) the interest rate on similar securities available in the market and the general interest rate scenario in the country, (ii) the market price of our Equity Shares, (iii) the market for listed debt securities, (iv) general economic conditions, and, (v) our financial performance, growth prospects and results of operations. The aforementioned factors may adversely affect the liquidity and market price of the NCDs, which may trade at a discount to the price at which you purchase the NCDs and/or be relatively illiquid.

- 47. *Our Company may raise further borrowings and charge its assets after receipt of necessary consents from its existing lenders. In such a scenario, the Debenture Holders holding the NCDs will rank pari passu with other secured creditors and to that extent, may reduce the amounts recoverable by the Debenture Holders upon our Company's bankruptcy, winding up or liquidation***

Our Company may, subject to receipt of all necessary consents from its existing lenders and the Debenture Trustee to the Issue, raise further borrowings and charge its assets. Our Company is free to decide the nature of security that may be provided for future borrowings. In such a scenario, the Debenture Holders holding the NCDs will rank *pari passu* with other creditors and to that extent, may reduce the amounts recoverable by the Debenture Holders upon our Company's bankruptcy, winding up or liquidation.

- 48. *Payments to be made on the NCDs are subordinated to certain taxes and other liabilities preferred by law. In the event of bankruptcy, liquidation or winding-up, there may not be sufficient assets of our Company remaining, to pay amounts due on the NCDs.***

The NCDs will be subordinated to certain liabilities preferred by law such as the claims of the Government on account of taxes, and certain liabilities incurred in the ordinary course of our business. In particular, in the event of bankruptcy, liquidation or winding-up, our Company's assets will be available to pay obligations on the NCDs only after all of those liabilities that rank senior to the NCDs have been paid as per Section 327 of the Companies Act, 2013 or Section 53 of Insolvency and Bankruptcy Code, 2016, as the case may be. In the event of bankruptcy, liquidation or winding-up, there may not be sufficient assets remaining to pay amounts, due on the NCDs.

- 49. *The fund requirement and deployment mentioned in the Objects of the Issue have not been appraised by any bank or financial institution.***

We intend to use the proceeds of the Issue, after meeting the expenditures of and related to the Issue, for the purpose of onward lending and for repayment of interest and principal of existing loans and also for general corporate purposes. For further details, see "*Objects of the Issue*" at page 63. The fund requirement and deployment is based on internal management estimates and has not been appraised by any bank or financial institution. The management will have significant flexibility in applying the proceeds received by us from the Issue. Further, as per the provisions of the SEBI Debt Regulations, we are not required to appoint a monitoring agency and therefore no monitoring agency has been appointed for the Issue.

- 50. *The liquidity for the NCDs in the secondary market is very low and it may remain so in the future and the price of the Bonds may be volatile.***

The Issue will be a new public issue of NCDs for our Company and the liquidity in NCDs at present is very low in the secondary market. Although an application has been made to list the NCDs on BSE, there can be no assurance that liquidity for the NCDs will improve, and if liquidity for the NCDs were to improve, there is no obligation on us to maintain the secondary market. The liquidity and market prices of the NCDs can be expected to vary with changes in market and economic conditions, our financial condition and prospects and other factors that generally influence market price of NCDs. Such fluctuations may significantly affect the liquidity and market price of the NCDs, which may trade at a discount to the price at which you purchase the NCDs.

- 51. *We rely significantly on our management team, our key managerial personnel and our ability to attract and retain talent. Loss of any member from our management team or that of our key managerial personnel may adversely affect our business and results of operation.***

We rely significantly on our core management team which oversees the operations, strategy and growth of our businesses. Our key managerial personnel have been integral to our development. Our success is largely dependent on our management team which ensures the implementation of our strategy. If one or more members of our management team are unable or unwilling to continue in their present positions, they may be difficult to replace, and our business and results of operation may be adversely affected.

- 52. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and the NBFC and Gold Loan industries contained in this Draft Prospectus.***

While facts and other statistics in this Draft Prospectus relating to India, the Indian economy as well as the Gold Loan industry have been based on various publications and reports from agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials, particularly since there is limited publicly available information specific to the Gold Loan industry. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics, the same have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “*Industry Overview*” beginning on page 65. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

EXTERNAL RISK FACTORS

- 53. *Financial difficulties and other problems in certain financial institutions in India could cause our business to suffer and adversely affect our results of operations.***

We are exposed to the risks of the Indian financial system, which in turn may be affected by financial difficulties and other problems faced by certain Indian financial institutions. Certain Indian financial institutions have experienced difficulties during recent years. Some co-operative banks (which tend to operate in rural sector) have also faced serious financial and liquidity crises. There has been a trend towards consolidation with weaker banks, NBFCs and HFCs being merged with stronger entities. The problems faced by individual Indian financial institutions and any instability in or difficulties faced by the Indian financial system generally could create adverse market perception about Indian financial institutions, banks and NBFCs. This in turn could adversely affect our business, our future financial performance, our shareholders’ funds and the market price of our NCDs.

- 54. *Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business***

Terrorist attacks and other acts of violence or war may negatively affect our business and may also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence. In addition, any deterioration in relations between India and its neighbouring countries might result in investor concern about stability in the region, which could adversely affect our business.

India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the market price of our NCDs.

- 55. *Natural calamities could have a negative impact on the Indian economy, particularly the agriculture sector, and cause our business to suffer.***

India has experienced natural calamities such as earthquakes, a tsunami, floods and drought in the past few years. The extent and severity of these natural disasters determines their impact on the Indian economy. Further, prolonged spells of below normal rainfall or other natural calamities could have a negative impact

on the Indian economy thereby, adversely affecting our business.

56. *Any downgrading of India's debt rating by an international rating agency could have a negative impact on our business.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, the interest rates and other commercial terms at which such additional financing is available. This could have a material adverse effect on our business and financial performance, our ability to raise financing for onward lending and the price of our NCDs.

57. *Instability of economic policies and the political situation in India could adversely affect the fortunes of the industry.*

There is no assurance that the liberalisation policies of the government will continue in the future. Protests against privatisation could slow down the pace of liberalisation and deregulation. The Government of India plays an important role by regulating the policies and regulations that govern the private sector. The current economic policies of the government may change at a later date. The pace of economic liberalisation could change and specific laws and policies affecting the industry and other policies affecting investments in our Company's business could change as well. A significant change in India's economic liberalisation and deregulation policies could disrupt business and economic conditions in India and thereby affect our Company's business.

Unstable domestic as well as international political environment could impact the economic performance in the short term as well as the long term. The Government of India has pursued the economic liberalisation policies including relaxing restrictions on the private sector over the past several years. The present Government has also announced policies and taken initiatives that support continued economic liberalisation. The Government has traditionally exercised and continues to exercise a significant influence over many aspects of the Indian economy. Our Company's business may be affected not only by changes in interest rates, changes in Government policy, taxation, social and civil unrest but also by other political, economic or other developments in or affecting India.

58. *As notified under Companies Act, 2013, public companies falling under specific categories, are required to prepare financial statements under the new accounting standards namely IND AS with effect from financial year 2016-17. While this is applicable for accounting periods beginning on or after April 1, 2019, for NBFCs such as our Company, we may be negatively affected by this transition.*

The MCA, on February 16, 2015 had notified that IND AS will be implemented in a phased manner starting from financial year 2016-17. Subsequently, the MCA vide a notification dated March 30, 2016, amended the Companies (Indian Accounting Standards) Rules, 2015 ("IND AS"), to require NBFCs such as our Company to comply with the Indian Accounting Standards, for accounting periods beginning on or after April 1, 2019, with comparatives for the periods ending March 31, 2019, based on our net worth, calculated in accordance with the standalone financial statements of our Company as on March 31, 2017. We have not determined with any degree of certainty the impact that such adoption will have on our financial reporting. Additionally, IND AS has fundamental differences with the existing accounting standards and therefore, financial statements prepared under IND AS may differ substantially from financial statements prepared under the existing framework of accounting standards. There can be no assurance that our financial condition, results of operation, cash flows or changes in shareholders' equity will not appear materially different under IND AS, Indian GAAP or IFRS. If we adopt IND AS reporting, we may encounter difficulties in the ongoing process of implementing and enhancing our management information systems. There can be no assurance that our adoption of IND AS, if required, will not affect our reported results of operations, financial condition and failure to successfully adopt IND AS in accordance with prescribed statutory and/or regulatory requirements within the timelines as may be prescribed may have an adverse effect on our financial position and results of operations.

Our Strengths

We are part of the Kosamattam Group which has a long operating history and a large customer base.

The Kosamattam Group was originally founded by Mr. Chacko Varkey. Over the years, we have been successful in expanding our customer base. Our total number of Gold Loan customers grew from 3,98,145 as of March 31, 2016, to 4,05,023 as of March 31, 2017, and to 4,08,362 customers as of January 31, 2018. We attribute our growth, in part, to our market penetration, particularly in areas less served by organised lending institutions and the efficient and streamlined procedural formalities which our customers need to complete in order to complete a loan transaction with us, which makes us a preferred medium of financier for our customers. We also attribute our growth to customer loyalty which in turn leads to repeat business. We believe that a large portion of our customer base returns to us to avail credit facility when they are in need of funds.

Branch network across rural and semi-urban areas in South India

We have rapidly expanded our branch network in the past, which we believe has provided us with an advantage of a wider reach. Our total number of branches grew from 880 branches in eight states and one union territory as on January 31, 2015 to 892 branches, as on January 31, 2018, in eight states and one union territory. Although we have historically had most of our branches in the southern states of India, we have expanded our branch network

by opening 10 branches in Delhi, five branches in Gujarat and five branches in Maharashtra. Our customers are typically retail customers, businessmen, vendors, traders, farmers, salaried individuals and families, who for reasons of convenience, accessibility or necessity, avail of our credit facilities by pledging their gold jewellery with us. We believe that with such a large network, we were able to penetrate and cater to our customers across various cities and towns in south India especially in semi-urban locations. Having such a network enables us to service and support our existing customers from proximate locations which gives our customers easy access to our services and enables us to reach new customers especially potential rural customers. We believe we can leverage on this existing network for further expansion and for fulfilling our customer requirements.

Organised and efficient IT Infrastructure

We use information technology as a strategic tool for our business operations to improve our overall productivity and efficiency. All our branches are computerised. We believe that through our existing information technology systems, we are able to effectively, manage our operations, market to our target customers, and monitor and control risks. We believe that this system has improved customer service by reducing transaction time and has allowed us to comply with regulatory record-keeping and reporting requirements. Further, in order to manage our expanding operations as well as our increased customer base, we have entered into an arrangement for the development of software for our product offerings and other allied functions. Accordingly, the new software was introduced for operational efficiency.

Further, our Company has entered into an agreement dated September 15, 2016, with PayU Payments Private Limited (“**PayU**”), a payment gateway, with a view to provide our customers with a convenient option of online payments through the internet or through the interactive voice responsive (‘IVR’) system provided by PayU, using credit/debit cards, net banking and various other modes of payment options.

Effective risk management system including appraisal, internal audit and inspections.

Risk management forms an integral part of our business as we are exposed to various risks relating to the Gold Loan business. The objective of our risk management system is to measure and monitor the various risks we are subject to and to implement policies and procedures to address such risks. We have an internal audit system which consists of audit and inspection, for risk assessment and internal controls. The audit system comprises of accounts audit and gold appraisal. In accordance with our internal audit policy, all of our branches are subject to surprise gold audit every month and accounts audit once in very four months. Further the staffs are strictly advised to make the acid test, sound test etc., at the time of making the pledge for checking whether the ornament is of acceptable quality or not.

Experienced management team and skilled personnel

Our Company is a professionally managed NBFC. Our management team comprises of our Promoter Director, Mr. Mathew K Cherian, who has over 38 years of experience in finance business. The management team possesses the required skill, expertise and vision to continue and to expand the business of our Company. Our management team has an in-depth understanding of the gold loan business and under their direction and guidance our Company has grown organically.

Strategy

Our business strategy is designed to capitalise on our competitive strengths and enhance our position in the Gold Loan industry. Key elements of our strategy include:

Expansion of business activity by opening new branches in rural and semi urban areas to tap potential market for gold loans

We intend to continue to grow our loan portfolio by expanding our branch network by opening new branches. A good reach to customers is very important in our business. Increased revenue, profitability and visibility are the factors that drive the branch network. Currently, we are present in key locations which are predominantly in South India for sourcing business. Our strategy for branch expansion includes further strengthening our presence in south Indian states by providing higher accessibility to customers as well as leveraging our expertise and presence in southern India. We have added 64 branches in the last three years and expect this growth trend to continue in the future. At the core of our branch expansion strategy, we expect to penetrate new markets and expand our customer base in rural and semi-urban markets where a large portion of the population has limited access to credit either because they do not meet the eligibility requirements of banks or financial institutions, or because credit is not available in a timely manner at reasonable rates of interest, or at all. A typical Gold Loan customer expects high

loan-to-value ratios, rapid and accurate appraisals, easy access, quick approval and disbursement and safekeeping of their pledged gold jewellery. We believe that we meet these criteria when compared to other unregulated money lenders, and thus our focus is to expand our Gold Loan business.

Expansion of business into metros and select Tier 1 cities across India

In addition to our continuing focus on rural and semi-urban markets in the states that we are present, we are also focusing on opening branches in metros and select Tier 1 cities where we believe our business has high growth potential. We carefully assess the market, location and proximity to target customers when selecting branch sites to ensure that our branches are set up close to our target customers. We believe our customers appreciate this convenience and it enables us to reach new customers.

Increase visibility of Kosamattam Brand to attract new customers

Our brand is key to the growth of our business. We started focusing on brand building exercise in 2013. Our logo was re-designed and the tag- line ‘Trust grows with time’ was introduced. We believe that we have built a recognisable brand in the rural and semi-urban markets of India, particularly in the southern states of Kerala, Tamil Nadu and Karnataka. We intend to continue to build our brand through advertisements and public relations campaigns and undertaking other marketing efforts on radio, television and outdoor advertising.

Diversifying into new business initiatives by leveraging our branch network and customer base.

Gold loan as on September 30, 2017 accounted for 90.4% of total loans portfolio of our Company. To reduce the risk of revenue volatility and with a view to expand our fee based income, we are in the process of diversifying our business to venture into the business of generators and distributors of electricity by using wind and/or other renewable energy. Further, we have received a license dated May 28, 2014 from SEBI to become a depository participant. Also, we have recently ventured into microfinancing business, by providing small ticket unsecured loans to our customers. Our Company intends to capitalise the large branch network to offer the additional products and services.

Minimise concentration risk by diversifying the Product Portfolio and expanding our customer base.

We intend to further improve the diversity of our product portfolio to cater to the various financial needs of our customers and increase the share of income derived from sale of financial products and services.

Beyond our existing Gold Loan product, we intend to leverage our brand and office network, develop complementary business lines and become the preferred provider of financial products – ‘a one-stop shop for customers’ financial needs. We have recently forayed into SME financing and mortgage loans.

Our diverse revenue stream will reduce our dependence on any particular product line thus enabling us to spread and mitigate our risk exposure to any particular industry, business, geography or customer segment. Offering a wide range of products helps us attract more customers thereby increasing our scale of operations.

We expect that complementary business lines will allow us to offer new products to existing customers while attracting new customers as well. We expect that our knowledge of local markets will allow us to diversify into products desired by our customers, differentiating us from our competitors.

Further strengthen our risk management, loan appraisal and technology systems

We believe risk management is a crucial element for further expansion of our Gold Loan business. We therefore continually focus on improving our integrated risk management framework with processes for identifying, measuring, monitoring, reporting and mitigating key risks, including credit risk, appraisal risk, custodial risk, market risk and operational risk. We plan to continue to adapt our risk management procedures, to take account of trends we have identified. We believe that prudent risk management policies and development of tailored credit procedures will allow us to expand our Gold Loan financing business without significantly increasing our non-performing assets. Since we plan to expand our geographic reach as well as our scale of operations, we intend to further develop and strengthen our technology platform to support our growth and improve the quality of our services. We are focused on improving our comprehensive knowledge base and customer profile and support systems, which in turn will assist us in the expansion of our business.

STATEMENT OF POSSIBLE TAX BENEFITS AVAILABLE TO THE DEBENTURE HOLDERS

The Board of Directors
Kosamattam Finance Limited
Kosamattam MKC Building,
Market Junction,
ML Road,
Kottayam-686001,
Kerala

The following tax benefits will be available to the debenture holders as per the existing provisions law. The tax benefits are given as per the prevailing tax laws and may vary from time to time in accordance with amendments to the law or enactments thereto. The debenture holder is advised to consider the tax implications in respect of subscription to the debentures after consulting his tax advisor as alternate views are possible. We are not liable to the debenture holder in any manner for placing reliance upon the contents of this statement of tax benefits.

A. IMPLICATIONS UNDER THE INCOME-TAX ACT, 1961 (“I.T. ACT”)**(i) To the Resident Debenture Holder**

1. Interest on NCD received by debenture holders would be subject to tax at the normal rates of tax in accordance with and subject to the provisions of the I.T. Act and such tax would need to be withheld at the time of credit/payment as per the provisions of Section 193 of the I.T. Act. However, no income tax is deductible at source in respect of the following:
 - (a) In case the payment of interest on debentures to a resident individual or a Hindu undivided family (“**HUF**”) Debenture Holder does not or is not likely to exceed `5,000/- in the aggregate during the Financial Year and the interest is paid by an account payee cheque.
 - (b) On any security issued by a company in a dematerialized form and is listed on recognized stock exchange in India in accordance with the Securities Contracts (Regulation) Act, 1956 and the rules made there under (with effect from June 01, 2008).
 - (c) When the Assessing Officer issues a certificate on an application by a Debenture Holder on satisfaction that the total income of the Debenture Holder justifies no/lower deduction of tax at source as per the provisions of Section 197(1) of the I.T. Act; and that certificate is filed with the Company before the prescribed date of closure of books for payment of debenture interest.
 - (d) (i) When the resident Debenture Holder with Permanent Account Number (“**PAN**”) (not being a company or a firm) submits a declaration as per the provisions of Section 197A (1A) of the I.T. Act in the prescribed form 15G verified in the prescribed manner to the effect that the tax on his estimated total income of the financial year in which such income is to be included in computing his total income will be NIL. However under Section 197A(1B) of the I.T. Act, “form 15G cannot be submitted nor considered for exemption from tax deduction at source if the dividend income referred to in Section 194 of the I.T. Act, interest on securities, interest, withdrawal from NSS and income from units of mutual fund or of Unit Trust of India as the case may be or the aggregate of the amounts of such incomes credited or paid or likely to be credited or paid during the previous year in which such income is to be included exceeds the maximum amount which is not chargeable to income tax”.

To illustrate for the Financial Year 2017-18, the maximum amount of income not chargeable to tax in case of individuals (other than senior citizens and super senior citizens) and HUFs is ` 250,000/-; in the case of every individual being a resident in India, who is of the age of 60 years or more but less than 80 years at any time during the Financial Year (Senior Citizen) is ` 300,000/-; and in the case of every individual being a resident in India, who is of the age of 80 years or more at anytime during the Financial Year (Super Senior Citizen) is ` 5,00,000/-.

Further, section 87A of the I.T. Act provides a rebate of 100% of income-tax or an amount of ` 2,500/- whichever is less to a resident individual whose total income does not exceed ` 3,50,000/-.

(ii) Senior citizens, who are 60 or more years of age at any time during the financial year, enjoy the special privilege to submit a self-declaration in the prescribed Form 15H for non-deduction of tax at source in accordance with the provisions of Section 197A (1C) of the I.T. Act even if the aggregate income credited or paid or likely to be credited or paid exceeds the maximum amount not chargeable to tax, provided that the tax due on total income of the person is NIL.

(iii) In all other situations, tax would be deducted at source as per prevailing provisions of the I.T. Act. Form No.15G with PAN / Form No.15H with PAN / Certificate issued under Section 197(1) has to be filed with the Company before the prescribed date of closure of books for payment of debenture interest without any tax withholding.

2. In case where tax has to be deducted at source while paying debenture interest, the Company is not required to deduct surcharge, education cess and secondary and higher education cess.
3. As per Section 2(29A) of the I.T. Act, read with Section 2(42A) of the I.T. Act, a listed debenture is treated as a long term capital asset if the same is held for more than 12 months immediately preceding the date of its transfer. Under Section 112 of the I.T. Act, capital gains arising on the transfer of long term capital assets being listed securities are subject to tax at the rate of 20% of capital gains calculated after reducing indexed cost of acquisition or 10% of capital gains without indexation of the cost of acquisition. The capital gains will be computed by deducting expenditure incurred in connection with such transfer and cost of acquisition/indexed cost of acquisition of the debentures from the sale consideration.

If transfer takes place after July 10, 2014, the above concessional rate of 10 percent will not be available in the case of long-term capital gain which arises on transfer of debt oriented mutual fund units.

However, as per the third proviso to Section 48 of I.T. Act, benefit of indexation of cost of acquisition under second proviso of Section 48 of I.T. Act, is not available in case of bonds and debenture, except capital indexed bonds. Thus, long term capital gains arising out of listed debentures would be subject to tax at the rate of 10% computed without indexation.

In case of an individual or HUF, being a resident, where the total income as reduced by such long-term capital gains is below the maximum amount which is not chargeable to income-tax, then, such long-term capital gains shall be reduced by the amount by which the total income as so reduced falls short of the maximum amount which is not chargeable to income-tax and the tax on the balance of such long-term capital gains shall be computed at the rate mentioned above.

4. Short-term capital gains on the transfer of listed debentures, where debentures are held for a period of not more than 12 months would be taxed at the normal rates of tax in accordance with and subject to the provisions of the I.T. Act. The provisions relating to maximum amount not chargeable to tax described at para 3 above would also apply to such short term capital gains.
5. In case the debentures are held as stock in trade, the income on transfer of debentures would be taxed as business income or loss in accordance with and subject to the provisions of the I.T. Act. Further, where the debentures are sold by the Debenture Holder(s) before maturity, the gains arising therefrom are generally treated as capital gains or business income, as the case may be. However, there is an exposure that the Indian Revenue Authorities (especially at lower level) may seek to challenge the said characterisation (especially considering the provisions explained in Para V below) and hold such gains/income as interest income in the hands of such Debenture Holder(s). Further, cumulative or regular returns on debentures held till maturity would generally be taxable as interest income taxable under the head Income from other sources where debentures are held as investments or business income where debentures are held as trading asset / stock in trade.

(ii) To the Non Resident Debenture Holder

1. A non-resident Indian has an option to be governed by Chapter XII-A of the I.T. Act, subject to the provisions contained therein which are given in brief as under:
 - (a) As per Section 115E of the I.T. Act, interest income from Debentures acquired or purchased with or subscribed to in convertible foreign exchange will be taxable at 20%, whereas, long term capital gains on transfer of such Debentures will be taxable at 10% of such capital gains without indexation of cost of

- acquisition. Short-term capital gains will be taxable at the normal rates of tax in accordance with and subject to the provisions contained therein.
- (b) As per Section 115F of the I.T. Act, long term capital gains arising to a non-resident Indian from transfer of debentures acquired or purchased with or subscribed to in convertible foreign exchange will be exempt from capital gain tax if the net consideration is invested within six months after the date of transfer of the debentures in any specified asset or in any saving certificates referred to in section 10(4B) of the I.T. Act in accordance with and subject to the provisions contained therein. To avail the benefit, the conditions as stipulated in the provision the section 115F of the Act should be complied with.
 - (c) As per Section 115G of the I.T. Act, it shall not be necessary for a non-resident Indian to file a return of income under Section 139(1) of the I.T. Act, if his total income consists only of investment income as defined under Section 115C and/or long term capital gains earned on transfer of such investment acquired out of convertible foreign exchange, and the tax has been deducted at source from such income under the provisions of chapter XVII-B of the I.T. Act in accordance with and subject to the provisions contained therein.
 - (d) Under Section 115H of the I.T. Act, where a non-resident Indian becomes a resident in India in any subsequent year, he may furnish to the Assessing Officer a declaration in writing along with return of income under Section 139 for the assessment year for which he is assessable as a resident, to the effect that the provisions of Chapter XII-A shall continue to apply to him in relation to the investment income (other than on shares in an Indian company) derived from any foreign exchange assets in accordance with and subject to the provisions contained therein. On doing so, the provisions of Chapter XII-A shall continue to apply to him in relation to such income for that assessment year and for every subsequent assessment year until the transfer or conversion (otherwise than by transfer) into money of such assets.
2. In accordance with and subject to the provisions of Section 115I of the I.T. Act, a Non-Resident Indian may opt not to be governed by the provisions of Chapter XII-A of the I.T. Act. In that case,
- (a) Long term capital gains on transfer of listed debentures would be subject to tax at the rate of 10% computed without indexation.
 - (b) Investment income and short-term capital gains on the transfer of listed debentures, where debentures are held for a period of not more than 12 months preceding the date of transfer, would be taxed at the normal rates of tax in accordance with and subject to the provisions of the I.T. Act.
 - (c) Where, debentures are held as stock in trade, the income on transfer of debentures would be taxed as business income or loss in accordance with and subject to the provisions of the I.T. Act.
3. Under Section 195 of the I.T. Act, the applicable rate of tax deduction at source is 20% on investment income and 10% on any long-term capital gains as per Section 115E, and at the normal rates for Short Term Capital Gains if the payee Debenture Holder is a Non-Resident Indian.
4. The income tax deducted shall be increased by a surcharge as under:
- (a) In the case of non-resident Indian surcharge at the rate of 10 % of such tax where the income or the aggregate of such income paid or likely to be paid and subject to the deduction exceeds `50,00,000/-But does not exceeds `1,00,00,000/-.
 - (b) In the case of non- resident Indian surcharge at the rate of 15% of such tax where the income or the aggregate of such income paid or likely to be paid and subject to the deduction exceeds Rs. 1,00,00,000/.
 - (c) In the case of non-domestic company, at the rate of 2% of such income tax where the income or the aggregate of such income paid or likely to be paid and subject to deduction exceeds `10,00,000/- but does not exceed` 100,00,000/-.
 - (d) In the case of non-domestic company, at the rate of 5% of such income tax where the income or the aggregate of such income paid or likely to be paid and subject to the deduction exceeds `100,00,000/-

Further 2% education cess and 1% secondary and higher education cess on the total income tax (including surcharge) is also deductible.

5. As per Section 90(2) of the I.T. Act read with the circular no. 728 dated October 30, 1995 issued by the Central Board of Direct Taxes ('CBDT'), in the case of a remittance to a country with which a Double Tax Avoidance Agreement ("DTAA") is in force, the tax should be deducted at the rate provided in the Finance Act of the relevant year or at the rate provided in the DTAA, whichever is more beneficial to the assessee. However, submission of tax residency certificate ('TCA') is a mandatory condition for availing benefits under any DTAA. In terms of Chapter XA of the Income Tax Act General Anti Avoidance Rule may be invoked notwithstanding anything contained in the Act. By this Rule any arrangement entered into by an assessee may be declared to be impermissible avoidance arrangement as defined in that Chapter and the consequence would be inter-alia denial of tax benefit, applicable w.e.f. April 4, 2016
6. Alternatively, to ensure non deduction or lower deduction of tax at source, as the case may be, the Debenture Holder should furnish a certificate under Section 197(1) of the I.T. Act, from the Assessing Officer before the prescribed date of closure of books for payment of debenture interest. However, an application for the issuance of such certificate would not be entertained in the absence of PAN as per the provisions of Section 206AA.
7. Where, debentures are held as stock in trade, the income on transfer of debentures would be taxed as business income or loss in accordance with and subject to the provisions of the I.T. Act. Further, where the debentures are sold by the Debenture Holder(s) before maturity, the gains arising there from are generally treated as capital gains or business income, as the case may be. However, there is an exposure that the Indian Revenue Authorities (especially at lower level) may seek to challenge the said characterisation (especially considering the provisions explained in Para V below) and hold such gains/income as interest income in the hands of such Debenture Holder(s). Further, cumulative or regular returns on debentures held till maturity would generally be taxable as interest income taxable under the head Income from other sources where debentures are held as investments or business income where debentures are held as trading asset / stock in trade.

(iii) To the Foreign Institutional Investors (FIIs)

1. In accordance with and subject to the provisions of Section 115AD of the I.T. Act, long term capital gains on transfer of debentures by FIIs are taxable at 10% (plus applicable surcharge and education and secondary and higher education cess) and short-term capital gains are taxable at 30% (plus applicable surcharge and education and secondary and higher education cess). The benefit of cost indexation will not be available. Further, benefit of provisions of the first proviso of Section 48 of the I.T. Act will not apply.
2. Income other than capital gains arising out of debentures is taxable at 20% in accordance with and subject to the provisions of Section 115AD of the I.T. Act.
3. The Finance Act, 2013 (by way of insertion of a new section 194LD in the I.T. Act) provides for lower rate of withholding tax at the rate of 5% on payment by way of interest paid by an Indian company to FIIs and qualified foreign investor in respect of rupee denominated bond of an Indian company between June 01, 2013 and June 01, 2017 provided such rate does not exceed the rate as may be notified by the Government.
4. In accordance with and subject to the provisions of Section 196D (2) of the I.T. Act, no deduction of tax at source is applicable in respect of capital gains arising on the transfer of debentures by FIIs.
5. The provisions at paragraph II (4, 5, 6 and 7) above would also apply to FIIs.

(iv) To the Other Eligible Institutions

All mutual funds registered under Securities Exchange Board of India or set up by public sector banks or public financial institutions or authorised by the Reserve Bank of India are exempt from tax on all their income, including income from investment in Debentures under the provisions of Section 10(23D) of the I.T. Act subject to and in accordance with the provisions contained therein.

(v) Exemption under sections 54EC and 54F of the I.T. Act

1. Under Section 54EC of the I.T. Act, long term capital gains arising to the debenture holders on transfer of the debentures in the company shall not be chargeable to tax to the extent such capital gains are invested in certain notified bonds within six months after the date of transfer. If only part of the capital gain is so invested, the exemption shall be proportionately reduced. However, if the said notified bonds are transferred or converted into money within a period of three years from their date of acquisition, the amount of capital gains exempted earlier would become chargeable to tax as long term capital gains in the year in which the bonds are transferred or converted into money. However, the exemption is subject to a limit of investment of ₹5,000,000/- during any financial year in the notified bonds. Where the benefit of Section 54EC of the I.T. Act has been availed of on investments in the notified bonds, a deduction from the income with reference to such cost shall not be allowed under Section 80C of the I.T. Act.

With effect from April 1, 2015 and will, accordingly, apply in relation to assessment year 2015-16 and subsequent years, the investment made by an assessee in the long-term specified asset, from capital gains arising from transfer of one or more original assets, during the financial year in which the original asset or assets are transferred and in the subsequent financial year does not exceed fifty lakh rupees.

2. As per the provisions of Section 54F of the I.T. Act, any long-term capital gains on transfer of a long term capital asset (not being residential house) arising to a Debenture Holder who is an individual or Hindu Undivided Family, is exempt from tax if the entire net sales consideration is utilized, within a period of one year before, or two years after the date of transfer, in purchase of a new residential house, or for construction of residential house within three years from the date of transfer. If part of such net sales consideration is invested within the prescribed period in a residential house, then such gains would be chargeable to tax on a proportionate basis.

This exemption is available; subject to the condition that the debenture holder does not own more than one residential house at the time of such transfer. If the residential house in which the investment has been made is transferred within a period of three years from the date of its purchase or construction, the amount of capital gains tax exempted earlier would become chargeable to tax as long term capital gains in the year in which such residential house is transferred. Similarly, if the Debenture Holder purchases within a period of two years or constructs within a period of three years after the date of transfer of capital asset, another residential house (other than the new residential house referred above), then the original exemption will be taxed as capital gains in the year in which the additional residential house is acquired. With effect from April 1, 2015 and will, accordingly, apply in relation to assessment year 2015-16 and subsequent years, the exemption is available if the investment is made in purchase or construction of one residential house situated in India.

“Capital gains” relating to long-term capital asset of the previous year in which the long-term specified asset is transferred.

Explanation 1 - In a case where the original asset is transferred and the assessee invests the whole or any part of the capital gain received or accrued as a result of transfer of the original asset in any long-term specified asset and such assessee takes any loan or advance on the security of such specified asset, he shall be deemed to have transferred such specified asset on the date on which such loan or advance is taken.

Indian Economy

Growth continues to be on a grind-up

According to CSO, India's real GDP growth in fiscal 2018 is estimated at 6.5%, down from 7.1% in fiscal 2017. Key reasons are the lingering impact of demonetisation, transitory disruptions caused by the implementation of the Goods and Services Tax (GST), and weak agricultural growth.

CPI inflation is expected to stay low this fiscal at 4% compared with 4.5% in fiscal 2017, as food inflation remains in control supported by a good monsoon forecast, bumper crop production in fiscal 2017 and benign global food prices. Some upside in inflation from higher global oil prices and pick-up in domestic demand is possible. But low food inflation to keep a tab on overall inflation.

While exports are likely to do better this year relative to the last, their growth would be limited because of a strong rupee and weak intensity of international trade. However, imports are expected to surge - on account buoyant domestic consumption and a strong rupee - and lead to a wider trade deficit. We therefore expect CAD to increase to 1.5% of GDP in fiscal 2018 from 0.7% of GDP in fiscal 2017.

Rupee is forecast at 65.5/\$ by fiscal 2018 end compared to 65.9/\$ at fiscal 2017 end. While rupee will be supported by robust foreign capital inflows, higher CAD may put some pressure on the downside.

While the government's direct tax collections and disinvestment receipts seem to be on the track, it is lagging on the non-tax revenue and GST front, suggesting pressure on the fiscal front.

Widespread concerns of fiscal slippage by the government have given a sudden push to the yields. We, therefore, now believe the 10-year G-sec yield may settle ~7.3% by fiscal-end and up from 6.83% at fiscal 2017 end.

Non-Banking Financial Institutions’ structure in India

Indian financial system includes banks and non-bank financial institutions. Though banking system remains dominant in financial services, non-banking financial institutions have grown in importance by carving a niche for themselves in the under-penetrated regions and unbanked segments.

NBFCs: an important part of the credit system

Financing needs in India have risen in sync with the notable growth recorded by the economy over the past decade. Non-banking financial companies (NBFCs) have played a major role in meeting this need, complementing banks and other financial institutions.

NBFCs help fill gaps in the availability of financial services with respect to products as well as customer and geographic segments. A strong linkage at the grassroots level makes them a critical cog in the financial machine. They cater to the unbanked masses in rural and semi-urban reaches and lend to the informal sector and people without credit histories, thereby enabling the government and regulators to realise the mission of financial inclusion. As of March 2017, they accounted for around 16 to 17% of the overall systemic credit.

Classification of NBFCs

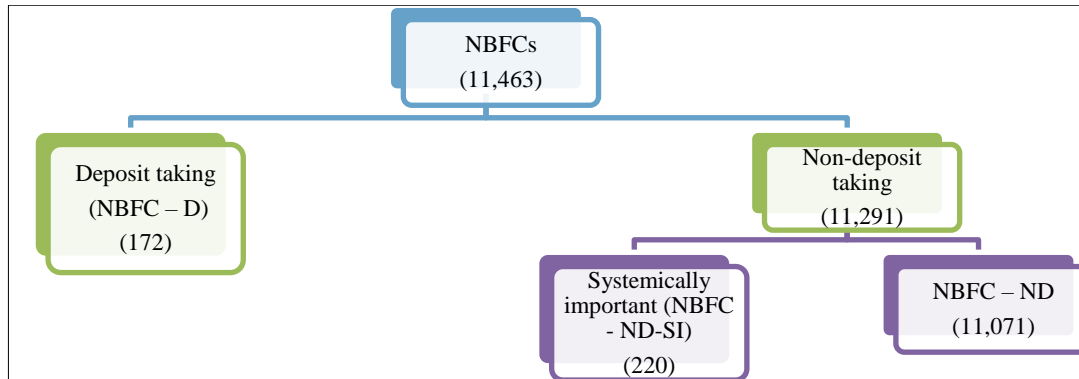

NBFCs have been classified on the basis of kind of liabilities they access, type of activities they pursue and their perceived systemic importance.

Liabilities-based classification

NBFCs are classified on the basis of liabilities in to two broad categories – a) deposit taking and b) non-deposit taking. Deposit taking NBFCs (NBFC – D) are subject to requirements of stricter capital adequacy, liquid assets maintenance, and exposure norms etc.

Further, in 2015, non-deposit taking NBFCs with asset size of Rs 5 billion and above were labelled as ‘systemically important non-deposit taking NBFCs’ (NBFC – ND – SI) and separate prudential regulations were made applicable to them.

Gold loan Industry

Gold loan is one of the most reliable credit sources for rural customers

Gold is synonymous with prosperity in India, and its possession, considered a certain hedge against inflation. People of all classes buy gold in form of jewellery, gold coins and bars during good times or on auspicious occasions. Due to this sentimental value is associated with gold and people are very averse to the idea of selling their gold possessions. They pledge them to local money lenders or pawn brokers in times of need, or to tide over financial crises, such as crop failure and medical exigencies. High liquidity of gold makes it a readily acceptable collateral. Most of the gold in India is held by people in rural areas. Rural residents and low income groups are the major customers of gold loans, as gold is usually the only asset they possess, in some quantity. They also typically lack access to banking facilities. Thus gold loan has emerged as one of the most reliable credit sources for these categories of customers. Unlike microfinance institution loans, gold loans can be availed for just about any reason: medical expenses, education, repair of household assets etc.

Regulatory tweaks restore shine for NBFCs

Gold loans are typically small ticket, short duration, convenient and instant credit. Though moneylenders and pawn brokers understand the psyche local borrowers and offer immediate liquidity without any documentation formalities, customers are left vulnerable to exploitation, due to the absence of regulatory oversight. Such players also give lower loan-to-value ratio compared with organized ones. As banks and NBFCs aggressively moved in to seize this vast untapped market, they cornered a significant market share from unorganized lenders, growing at a compounded annual growth rate (CAGR) of 76% between fiscals 2009 and 2012. Sustained increase in gold price till 2012 saw the gold loan business boom in India. In such a scenario, customers could be offered higher and higher loan amounts on their gold, while lenders would benefit by price increases acting as a natural hedge, in the event of default.

The unrestrained growth in the NBFCs' gold loan offtake alarmed the Reserve Bank of India (RBI), given the significant amount of public funds (deposits) borrowed by the NBFCs and the high concentration of gold loans in their books (gold loans accounted for 90% of the loan book at the end of FY 2012).

The RBI moved to tighten regulations on gold loans through several measures including: 1) withdrawal of priority sector benefit on loans; 2) capping the loan-to-value (LTV) ratio to ensure a level playing field between banks and NBFCs; 3) issuing guidelines on fair practice codes; 4) stipulating stringent norms for conducting gold auctions and 5) imposing curbs on lending against bullion or gold coins above 50 gm to restrict borrowing to fund speculative investment in gold. These measures, along with a dip in gold prices, led to a slowdown in the overall

gold loan book which expanded by just 22% in 2012-13 compared to 71% during 2010-11 and 91% during 2011-12. Thereafter, growth was driven by banks, who were looking for secured lending avenues in a scenario of slowdown in corporate credit.

In September 2013, the RBI issued new norms for NBFCs, which included: adoption of a uniform valuation methodology, prior approval for any expansion exceeding 1000 branches, and stipulation to disburse loans exceeding Rs 0.1 million and above only through cheque.

The tighter regulatory environment between 2012 and 2014 debilitated the specialised gold loan NBFCs, impacted the growth of gold loan NBFCs, who then lost considerable ground to banks and the unorganised sector. In FY 14 the market share of NBFCs specializing in gold loans came down to 22% from a high of 27% in FY 12. However, in the long term, the intervention strengthened the sector’s ability to withstand price risk, improve customer service and standardise processes related to security valuation. It compelled NBFCs to reconsider their strategies. The LTV ratio was also reduced, thereby de-risking the business. There was focus on regular, monthly collection of interest, to preserve lending margin against the backdrop of volatile gold prices. Some also pursued diversification into new areas like home and commercial vehicle loans, small and medium enterprises lending and microfinance as part of risk mitigation.

The fiscal 2015 saw some stability restored to the NBFC sector. The RBI had raised the permissible LTV ratio up to 75% in January 2014, from 60% earlier. Now, banks were also asked to cap the LTV ratio at 75% and standardize procedures for valuing collateral. Thus, a major demand of the gold loan NBFCs, of a level playing field versus banks, was conceded. As of March 2017 NBFCs offer LTVs in the range of 65-75% with a leading player having a weighted average LTV of 67% for the fiscal. The LTV offered is based on the tenure of loan, interest charged and sensitivity of the customer to the LTV. As a result, gold loan NBFCs have managed to regain most of the lost ground from banks and their market share had bounced back to 26% by FY 2017. In March 2017 the limit to disburse loans through cash was brought down to Rs 20,000.

NBFCs growth driving industry growth

The regulatory changes also reflected in the organised sector’s AUMs. A 3% fall in gold price along with RBI’s restrictions in fiscal 2014 led to decrease in gold loan AUM growth to a marginal 2% from 28% in fiscal 2013; the AUM growth was stunted mainly on account of the steep fall in NBFC AUMs by 18%. However, despite a 6% decline in gold prices in fiscal 2015, gold loan AUMs grew 3% and NBFC AUMs recovered 9%, driven by greater demand. This trend has continued in fiscal 2016 too: despite an average decline of 3% in gold prices, NBFC AUMs are estimated to have grown 4%. Industry AUMs, on the other hand, has recorded a 3% decline. Aided by a good monsoon and international issues like Brexit, gold prices recovered by 12% in FY17 which gave the gold loan industry a much needed boost; the industry AUMs grew by a healthy 8% and NBFC AUMs reached the mark of 13% growth. We expect NBFC AUMs to grow by 9% CAGR over 2 years till FY19 which will be

supported mainly by rise in the stock of gold pledged as gold prices are expected to remain range bound over the next two years. Non-traditional regions will contribute to growth, aided by players’ marketing efforts. A favourable economic scenario will also drive up funding needs of small businesses, and hence increase demand for gold loans.

NBFCs regain lost ground from banks

Specialized gold loan NBFCs have witnessed exceptional growth amongst organized players. This growth is driven by aggressive expansion of branches, heavy spend on marketing and rapid acquisition of customers. NBFCs and banks approach the gold loan market differently, reflected in their interest rates, ticket sizes and loan tenures.

NBFCs focus more single-mindedly on the gold loans business and have, accordingly, built their service offerings by investing significantly in manpower, systems, processes and branch expansion. This has helped them attract and serve more customers. Some of their advantages are:

Less documentation enabling faster turnaround

Adequate systems to ensure quick disbursals. For example, NBFCs have dedicated personnel to value the gold jewels at the branches.

Flexible repayment options, wherein the borrower can pay both the interest and principal at closure of the loan. Greater accessibility due to better penetration, ability to serve non-bankable customers.

Single product focus on gold loans enabling them to develop strong appraisal and valuation expertise, resulting in faster and better customer service. Banks, on the other hand, have a more vigilant approach. They view gold loans as a safer means to meet their priority sector lending targets, especially agricultural loans. Even in the case of non-agricultural gold loans, they mostly target the organised segment or their existing customers as they are unable to offer flexible and rapid disbursals. It is only a few south-based banks - Indian Overseas Bank, Indian Bank and South Indian Bank - which have a higher share in non-agricultural gold loan disbursements, given the region’s proclivity for gold loans.

For the above discussed reasons, NBFCs are preferred by customers over banks, and specialised NBFCs enjoy higher profitability. With the RBI’s curbs on this sector easing, and changes in regulations providing a level playing field for both classes of lenders, NBFCs have gradually recovered market share in fiscal 2016-17, a trend that CRISIL Research estimates has continued in fiscal 2018 as well. However, competitive intensity for specialised gold loan NBFCs may increase with small finance banks entering the fray.

South-based NBFCs dominate the gold loan NBFC market

India's top three gold loan NBFCs are based in the south and controlled over 79% of the market (in terms of AUMs), as of March 31, 2017. This is an obvious consequence of a more evolved gold loan market in the region. However, many smaller NBFCs have reduced focus on the business, given the RBI's stringent norms and the fall in gold prices.

South remains key market; even as other regions emerge

Demand for gold is skewed towards the southern states, as households here account for the largest share of accumulated gold stock in the form of ornaments, coins, bars, etc.

Regional gold demand

Moreover, holders in the south are more open to pledging gold to raise funds than people in other regions. Although attempts by NBFCs to expand in certain pockets of northern and western India have lowered the share of southern markets, it still remains a stronghold.

However, NBFCs will still have to contend with public sentiment against pledging gold and the distrust for financiers, as they look to expand beyond the south.

South accounts for major share of NBFC AUMs

Though the south will continue to dominate, other underpenetrated regions in northern and western India are likely to emerge as growth centres. This will also be aided by changing consumer perception about gold loans and rising funding requirements.

Profitability improved in 2016-17, industry to perform well in medium term

Profitability of NBFCs has bounced back after declining in the aftermath of tighter RBI regulations. There has been a steady decline in the cost of funds for NBFCs from 2012-13. Cost of funds declined due to reduction in lending rates by banks, which are the source of nearly half of NBFC borrowings. Yield on funds is expected to decline as NBFCs pass on the benefit of a reduction in cost of funds to customers. Profitability improved sharply in 2016-17, as increased business per branch improved the cost/income ratio. Demonetisation did affect profitability marginally but gold loan NBFCs limited the problem by offering alternative payment options to their customers till cash availability stabilised. The incremental cost of borrowing is nearly 100 bps lower than the average cost of borrowing. Thus, there is room for a further fall in average cost of borrowings in 2017-18.

Source: Company reports, CRISIL Research

CRISIL Research expects the industry to continue to perform well in the medium term. Gold prices have remained stable this fiscal. Policy measures such as demonetisation led to decline in demand for gold especially in rural areas, and gold demand fell to a seven-year low in 2016-17. Domestic gold prices in 2017-18 are expected to remain less volatile, as escalating tensions in the Korean peninsula and instability in the European Union caused by Brexit could cause price rise, but rise in US Fed rates could have a dampening effect. Delinquencies may rise marginally, as the effect of a shift towards tighter non-performing assets (NPAs) recognition norms would be offset by low volatility in gold prices and reduction in gold loan tenure. Low volatility in gold prices, especially on the downside, bodes well for gold loan NBFCs, as it reduces the possibility of default, and the consequent increase in NPAs. Thus credit costs are expected to rise marginally in 2017-18.

Operating expenses are expected to remain stable in 2017-18, as benefit of reduction in cost due to improvement in operating efficiencies will be offset by added cost of expanding in new geographies. NBFCs have to recognise NPAs at 90 days past due (dpd) from 2017-18, as against 120 dpd in 2016-17, and many leading NBFCs started provisioning for NPAs at 90 dpd in 2016-17 itself. This saw credit costs spike that year. These costs are expected to rise marginally in 2017-18 and decline in 2018-19.

Asset quality to deteriorate marginally with tighter recognition norms

Gold prices posted a healthy recovery in 2016-17, with a 12% rise on-year. Prices remained subdued in the first quarter of 2017-18, but on the back of global uncertainties caused by the instability in the Korean peninsula in July-August, gold prices inched up by 1% in the second quarter. A rise in gold prices has historically lowered under recoveries and boosted profitability, a trend which continued in 2016-17. Volatility in gold prices is expected to remain low in 2017-18. Also, players are focusing on de-risking their business models from volatility in gold prices by tightening interest collections (regular interest collections versus bullet system in the past) and lowering tenure of loans, which will maintain asset quality even though NPA recognition norms become stringent.

Our Strengths

We are part of the Kosamattam Group which has a long operating history and a large customer base.

The Kosamattam Group was originally founded by Mr. Chacko Varkey. Over the years, we have been successful in expanding our customer base. Our total number of Gold Loan customers grew from 3,98,145 as of March 31, 2016, to 4,05,023 as of March 31, 2017, and to 4,08,362 customers as of January 31, 2018. We attribute our growth, in part, to our market penetration, particularly in areas less served by organised lending institutions and the efficient and streamlined procedural formalities which our customers need to complete in order to complete a loan transaction with us, which makes us a preferred medium of financier for our customers. We also attribute our growth to customer loyalty which in turn leads to repeat business. We believe that a large portion of our customer base returns to us to avail credit facility when they are in need of funds.

Branch network across rural and semi-urban areas in South India

We have rapidly expanded our branch network in the past, which we believe has provided us with an advantage of a wider reach. Our total number of branches grew from 880 branches in eight states and one union territory as on January 31, 2015 to 892 branches, as on January 31, 2018, in eight states and one union territory. Although we have historically had most of our branches in the southern states of India, we have expanded our branch network by opening 10 branches in Delhi, five branches in Gujarat and five branches in Maharashtra. Our customers are

typically retail customers, businessmen, vendors, traders, farmers, salaried individuals and families, who for reasons of convenience, accessibility or necessity, avail of our credit facilities by pledging their gold jewellery with us. We believe that with such a large network, we were able to penetrate and cater to our customers across various cities and towns in south India especially in semi-urban locations. Having such a network enables us to service and support our existing customers from proximate locations which gives our customers easy access to our services and enables us to reach new customers especially potential rural customers. We believe we can leverage on this existing network for further expansion and for fulfilling our customer requirements.

Organised and efficient IT Infrastructure

We use information technology as a strategic tool for our business operations to improve our overall productivity and efficiency. All our branches are computerised. We believe that through our existing information technology systems, we are able to effectively, manage our operations, market to our target customers, and monitor and control risks. We believe that this system has improved customer service by reducing transaction time and has allowed us to comply with regulatory record-keeping and reporting requirements. Further, in order to manage our expanding operations as well as our increased customer base, we have entered into an arrangement for the development of software for our product offerings and other allied functions. Accordingly, the new software was introduced for operational efficiency.

Further, our Company has entered into an agreement dated September 15, 2016, with PayU Payments Private Limited (“PayU”), a payment gateway, with a view to provide our customers with a convenient option of online payments through the internet or through the interactive voice responsive (‘IVR’) system provided by PayU, using credit/debit cards, net banking and various other modes of payment options.

Effective risk management system including appraisal, internal audit and inspections.

Risk management forms an integral part of our business as we are exposed to various risks relating to the Gold Loan business. The objective of our risk management system is to measure and monitor the various risks we are subject to and to implement policies and procedures to address such risks. We have an internal audit system which consists of audit and inspection, for risk assessment and internal controls. The audit system comprises of accounts audit and gold appraisal. In accordance with our internal audit policy, all of our branches are subject to surprise gold audit every month and accounts audit once in very four months. Further the staffs are strictly advised to make the acid test, sound test etc., at the time of making the pledge for checking whether the ornament is of acceptable quality or not.

Experienced management team and skilled personnel

Our Company is a professionally managed NBFC. Our management team comprises of our Promoter Director, Mr. Mathew K Cherian, who has over 38 years of experience in finance business. The management team possesses the required skill, expertise and vision to continue and to expand the business of our Company. Our management team has an in-depth understanding of the gold loan business and under their direction and guidance our Company has grown organically.

Strategy

Our business strategy is designed to capitalise on our competitive strengths and enhance our position in the Gold Loan industry. Key elements of our strategy include:

Expansion of business activity by opening new branches in rural and semi urban areas to tap potential market for gold loans

We intend to continue to grow our loan portfolio by expanding our branch network by opening new branches. A good reach to customers is very important in our business. Increased revenue, profitability and visibility are the factors that drive the branch network. Currently, we are present in key locations which are predominantly in South India for sourcing business. Our strategy for branch expansion includes further strengthening our presence in south Indian states by providing higher accessibility to customers as well as leveraging our expertise and presence in southern India. We have added 64 branches in the last three years and expect this growth trend to continue in the future. At the core of our branch expansion strategy, we expect to penetrate new markets and expand our customer base in rural and semi-urban markets where a large portion of the population has limited access to credit either because they do not meet the eligibility requirements of banks or financial institutions, or because credit is not

available in a timely manner at reasonable rates of interest, or at all. A typical Gold Loan customer expects high loan-to-value ratios, rapid and accurate appraisals, easy access, quick approval and disbursement and safekeeping of their pledged gold jewellery. We believe that we meet these criteria when compared to other unregulated money lenders, and thus our focus is to expand our Gold Loan business.

Expansion of business into metros and select Tier 1 cities across India

In addition to our continuing focus on rural and semi-urban markets in the states that we are present, we are also focusing on opening branches in metros and select Tier 1 cities where we believe our business has high growth potential. We carefully assess the market, location and proximity to target customers when selecting branch sites to ensure that our branches are set up close to our target customers. We believe our customers appreciate this convenience and it enables us to reach new customers.

Increase visibility of Kosamattam Brand to attract new customers

Our brand is key to the growth of our business. We started focusing on brand building exercise in 2013. Our logo was re-designed and the tag- line ‘Trust grows with time’ was introduced. We believe that we have built a recognisable brand in the rural and semi-urban markets of India, particularly in the southern states of Kerala, Tamil Nadu and Karnataka. We intend to continue to build our brand through advertisements and public relations campaigns and undertaking other marketing efforts on radio, television and outdoor advertising.

Diversifying into new business initiatives by leveraging our branch network and customer base.

Gold loan as on September 30, 2017 accounted for 90.4% of total loans portfolio of our Company. To reduce the risk of revenue volatility and with a view to expand our fee based income, we are in the process of diversifying our business to venture into the business of generators and distributors of electricity by using wind and/or other renewable energy. Further, we have received a license dated May 28, 2014 from SEBI to become a depository participant. Also, we have recently ventured into microfinancing business, by providing small ticket unsecured loans to our customers. Our Company intends to capitalise the large branch network to offer the additional products and services.

Minimise concentration risk by diversifying the product portfolio and expanding our customer base.

We intend to further improve the diversity of our product portfolio to cater to the various financial needs of our customers and increase the share of income derived from sale of financial products and services.

Beyond our existing Gold Loan product, we intend to leverage our brand and office network, develop complementary business lines and become the preferred provider of financial products – ‘a one-stop shop for customers’ financial needs. We have recently forayed into SME financing and mortgage loans.

Our diverse revenue stream will reduce our dependence on any particular product line thus enabling us to spread and mitigate our risk exposure to any particular industry, business, geography or customer segment. Offering a wide range of products helps us attract more customers thereby increasing our scale of operations.

We expect that complementary business lines will allow us to offer new products to existing customers while attracting new customers as well. We expect that our knowledge of local markets will allow us to diversify into products desired by our customers, differentiating us from our competitors.

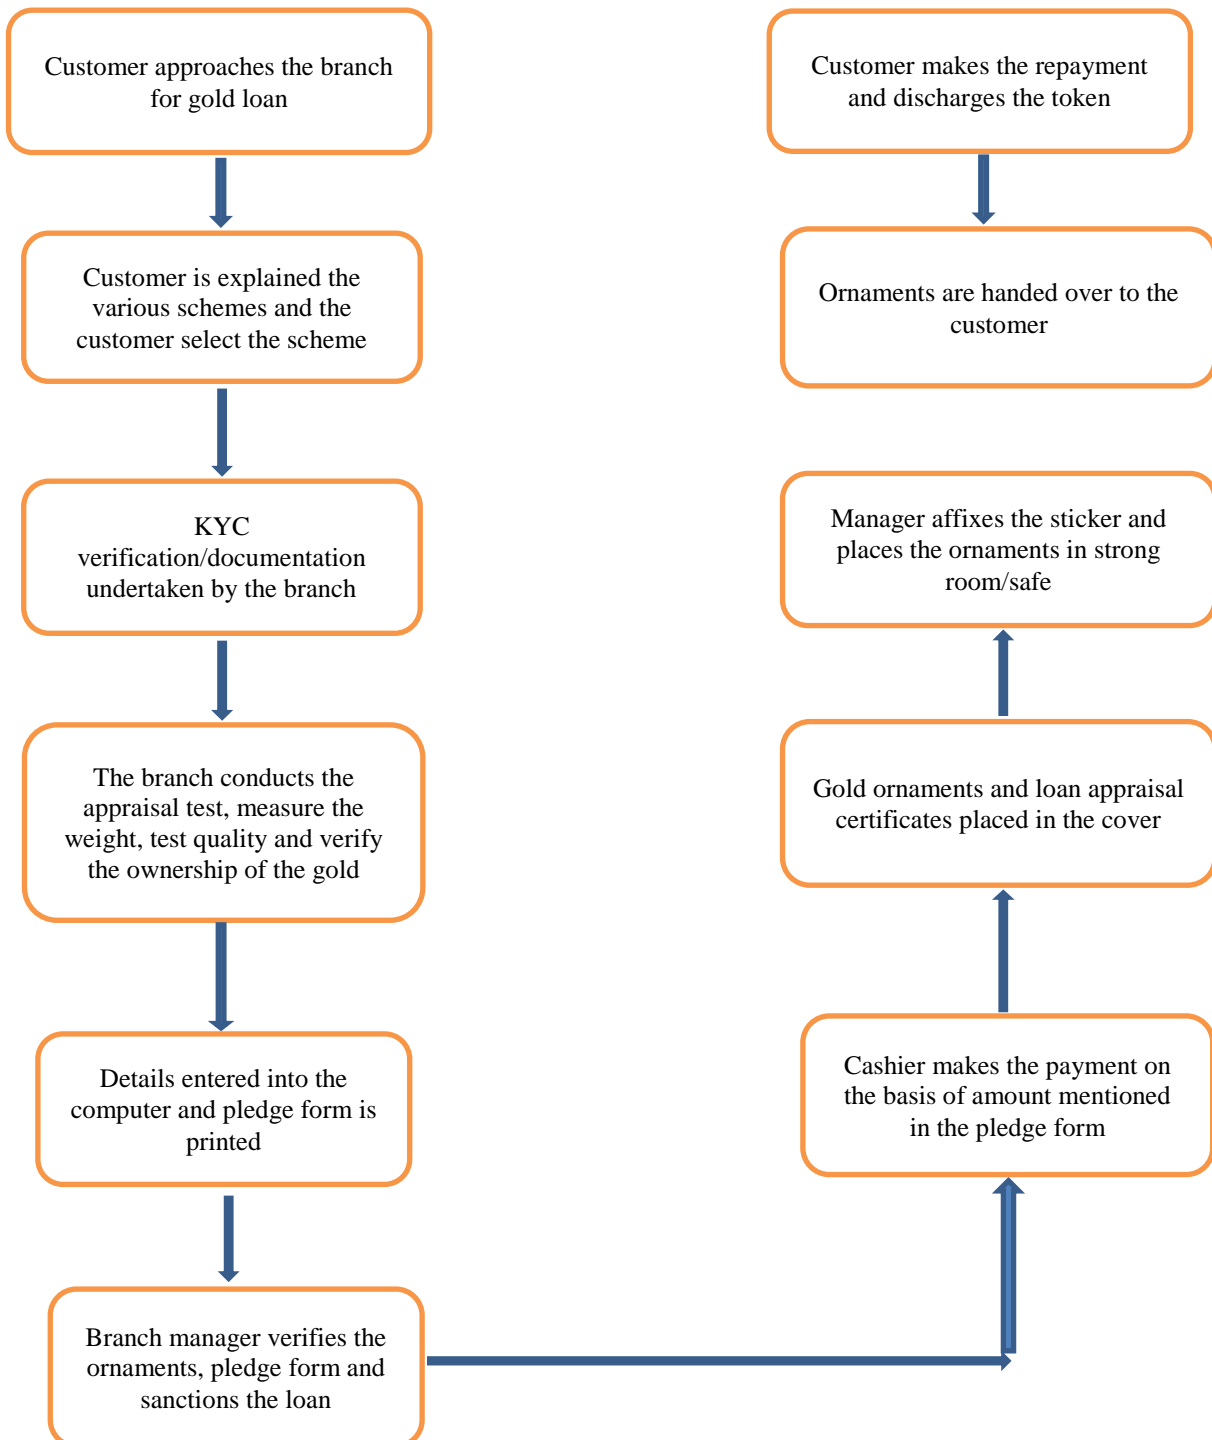

Further strengthen our risk management, loan appraisal and technology systems

We believe risk management is a crucial element for further expansion of our Gold Loan business. We therefore continually focus on improving our integrated risk management framework with processes for identifying, measuring, monitoring, reporting and mitigating key risks, including credit risk, appraisal risk, custodial risk, market risk and operational risk. We plan to continue to adapt our risk management procedures, to take account of trends we have identified. We believe that prudent risk management policies and development of tailored credit procedures will allow us to expand our Gold Loan financing business without significantly increasing our non-performing assets. Since we plan to expand our geographic reach as well as our scale of operations, we intend to further develop and strengthen our technology platform to support our growth and improve the quality of our services. We are focused on improving our comprehensive knowledge base and customer profile and support systems, which in turn will assist us in the expansion of our business.

GOLD LOAN BUSINESS

Our lending business is primarily Gold Loans, which are typically loans against pledge of gold jewellery. As of January 31, 2018, we had approximately 6,16,800 loan accounts, representing an aggregate principal balance of ₹1,90,416.28 lakhs. For the six-month period ended September 30, 2017 and for the financial years ended March 31, 2017, March 31, 2016 and March 31, 2015, our Gold Loan portfolio yield representing interest income on gold loans as a percentage of average outstanding of Gold Loans, for the same period were 19.72%, 21.12%, 26.35% and 23.33%, respectively, per annum. In the six-month period ended September 30, 2017 and the financial years ended March 31, 2017, March 31, 2016 and March 31, 2015, income from interest earned on our Gold Loans constituted 91.36%, 91.62%, 93.34% and 96.43%, of our total income for the respective years. We offer variety of Gold Loan schemes to our customers to suit their individual needs. The schemes differ in relation to the amount advanced per gram of gold, interest rate chargeable and amount of loan.

Gold Loan disbursement process

The principal form of security that we accept is household gold jewellery. We do not accept bullion, gold biscuits, gold bars, new mass-produced gold jewellery or medallions. While these restrictions narrow the pool of assets that may be provided to us as security, we believe that it provides us with the following key advantages:

- a. It filters out spurious jewellery that may be pledged by jewellers and goldsmiths. We find that household, used jewellery is less likely to be spurious or fake.
- b. The emotional value attached by each household to the pledged jewellery acts as a strong incentive for timely repayment of loans and revoking the pledge.
- c. As we only accept the pledge of household jewellery, the value of the pledged gold is typically only as much as the worth of gold that is owned by an average Indian household. This prevents our exposure to large sized loans where the chances of default and subsequent losses are high.

The amount that we finance against the pledged gold jewellery is typically based on a fixed rate per gram of gold content in the jewellery. We value the gold jewellery brought by customers based on our corporate policies and guidelines. As per the policy, we grant gold loans on 22 Carat gold ornaments. However, in case the jewels that are being pledged are less than 22 carats, the branches are required to convert the carat of gold jewels to the equivalent of 22 carats. Under no-circumstances are gold ornaments below 19 carats accepted by our Company. The rates per gram is fixed by us on weekly intervals. The actual loan amount varies according to the type of jewellery pledged. While jewellery can be appraised based on a variety of factors, such as total weight, weight of gold content, production cost, style, brand and value of any gemstones, we appraise the gold jewellery solely based on its gold content. Our Gold Loans are, therefore, generally well collateralised because the actual value of the gold jewellery is higher than our appraised value of the gold jewellery when the loan is disbursed. The amount we lend against an item and the total value of the pledged gold we hold fluctuates according to the market price of gold. An increase in the price of gold will not automatically result in an increase in the value of our Gold Loan portfolio unless the rate per gram is revised by our Corporate Office. It only results in a favourable movement in the value of the security, pledged with us. Similarly, since adequate margins are built in at the time of the loan disbursement and owing to the short tenure of these loans, on average, a decrease in the price of gold generally has little impact on our interest income. However, a sustained decrease in the market price of gold could cause a decrease in the growth rate of Gold Loans in our loan portfolio.

At present our Gold Loans have a tenure that vary from six-months to 12 months, however, customers may redeem the loan at any time prior to the full tenure. As per the current policy of our Company, interest is to be paid in accordance with the scheme. In the event that a loan is not repaid on time and after providing due notice to the customer, the unredeemed pledged gold is disposed of, on behalf of the customer in satisfaction of the principal and interest charges in accordance with the applicable RBI guidelines. Any surplus arising out of the disposal of the pledged gold is refunded to the customer or is appropriated towards any other liability by the borrower. In the event that the recoverable amount is more than the realisable value of the pledged gold, the customer remains liable for the shortfall.

The processes involved in approving and disbursing a Gold Loan are divided into three phases:

- Pre-disbursement;
- Post disbursement; and
- Release of the pledge.

Pre-disbursement process

Gold Loan appraisal of a customer involves the following steps

(a) Customer identification

Gold Loans are sanctioned only to genuine borrowers. Before sanctioning the Gold Loan, the branch manager should take all precautions to ensure that the applicant, pledging the ornaments, is the owner of those ornaments and that the borrower is genuine. The branch manager should obtain ID proof and photograph of the borrower and assign a branch KYC ID No. and should also make reasonable enquiry about the residence, job, personal details, ownership of the ornaments etc. and make a note in the pledge form. We also undertake a field verification to authenticate the genuineness of the borrower in case of high value Gold Loans.

(b) *KYC Documentation*

The borrower should produce government issued valid photo id, with an address which is within the designated area of the branch, as a necessary proof for KYC documentation. While processing the application, the branch ensures that the correct postal address of the borrower is entered in the computer such as name, door number, street name, name of post office, place, PIN code and the nearest land mark. Also, the borrower's telephone number is obtained. The branch also calls on the number furnished by the borrower every month, and reminds the borrower to remit the requisite interest, so that branch can know the telephone number is operational. Further if the telephone number of the borrower is not operational then the branch immediately contacts the borrower personally and obtains his new telephone number.

(c) *Security appraisal*

The branch manager/joint custodian and the branch staff shall appraise the gold ornaments thoroughly. Stone weight should be deducted correctly in consultation with the branch manager and staff. Low purity and spurious items should be detected and not to be accepted as pledge. Appraisal is to be done by all members at the branch and the ornament shall be accepted only if all the branch staff approve. Neither the branch manager nor the joint custodian or any staff has the authority to accept a pledge on the basis of his/her own assessment of the ornaments. It is strictly a group task and all the branch staff are equally responsible in the process. After pledging gold ornaments, the same should be packed immediately. The manager and joint custodian should sign across the packet and affix the branch sticker on the cover and keep it in the safe. The safe is to be locked by all the custodians together.

(d) *Documentation*

For each pledge of the gold, branch appraisal certificate, application for personal loan, customer's token etc., are adequately documented and all the details pertaining to the gold, including the weight and items pledged are to be mentioned.

Post-disbursement process

The period/tenure for a Gold Loans typically varies from six-months to 12 months. Timely interest collection and closing of accounts within the specified period is vital for the successful and smooth functioning of gold loan companies like that of ours. To ensure this, the branches regularly follow up with their gold loan customers through notices served at three months (ordinary notice), six-months (registered notice), and nine months (registered notice with acknowledgement due) as well as personal contacts directly and over the phone.

Branch security and safety measures: Electronic Security System

Branches are normally equipped with security devices (alarms) which automatically alert the branch manager, regional manager as well as the nearest police station in the event of any theft attempts. The gold pledged as security is insured with an insurance company. Our Company makes periodic analysis and revises the insurance policy as per the value/quantity of the gold.

Release of pledge

Once a loan is fully repaid, the pledged gold jewellery is returned to the customer. The customer must be present personally along with the gold loan token, at the branch where the pledge was originally made. The branch will verify the person with the photo taken at the time of pledge and confirm that there is no foul play and the amount to be paid is informed to the customer from the software and clarifies doubts if any on the amount demanded. The customer pays the amount at the cash counter and the ornaments are taken out of the safe and handed over to the customer after confirming them with the list of ornaments mentioned in the token and gold loan application form.

Our Other Business initiatives

In addition to the core business of Gold Loan, we also offer fee based ancillary services which among others include loan against property, money transfer services, depository participant services, power generation, agriculture, foreign currency exchange and air ticketing services.

2016 and March 31, 2015, revenues from our business other than Gold Loans constituted 8.64%, 8.38%, 6.66% and 3.57%, of our total income for the respective years.

As a part of LAP lease rental discounting is also offered. The funds so raised are utilised for meeting business as well as investment needs.

Customer Evaluation, Credit Appraisal and Disbursement

Our Credit Policies

All loans are sanctioned under the credit policy approved by our Board of Directors. Emphasis is applied on demonstrated past and future assessment of income, repayment capacity and credit history prior to approving any loan. Our Company undertakes periodic update of credit policies based on portfolio performance, product profitability and market and economic development.

Loan Origination

Our Company sources all potential customers through our branches and trained sourcing teams.

Evaluation

Our Company undertakes various credit control checks and field investigations on a prospective customer which inter-alia includes an internal data de-duplication check, CIBIL database check, fraud verification, asset verification and valuation, trade credit reference checks and other legal and technical verification procedures. After having completed our internal verification procedures all documents submitted by the prospective customer are checked and verified as required and any discrepancies and/or gaps in such documentation are highlighted and sent to the prospective customer for corrections, explanations and resubmissions as required.

Our Company conducts various diligence procedures in connection with the collateral/security for such loans which include review and verification of the relevant ownership documents and obtain title reports as applicable. Reports from these checks along with detailed analysis of financial statements, tax challans, bank statements and other documents put together constitute the credit file for all customers. These files are at length reviewed by the credit managers for evaluation using credit evaluation tool. Based on the document review the credit managers conduct personal discussions with the customers at their workplace. The discussion is intended to gather information about the business model of the customer, his positioning in the value chain, dependence of suppliers and/or customers and to ascertain any business risks like export dependence, raw-material supplies, etc. which might adversely impact the business cash flows and hence diminish repayment capacity. Further, additional business documents like stock registers and books of accounts are reviewed during such visits. Based on the all the information gathered, and assessment of customer’s business risks, debt servicing ability and collateral risks, the credit manager puts the transaction proposal to appropriate approving committee in the hierarchy for decision.

Credit Appraisal

Approval and Disbursement Process

Once the credit history, credentials, information and documents have been submitted by the prospective customer and verified to our satisfaction, the applications are approved at the appropriate credit approval level.

There are four progressive levels of approvals which a proposal can be put to which are based on loan product, loan amount and identified risks. All proposals require minimum of two approvals and up to four approvals for larger ticket size loans. With due sanctioning of the loan, we execute agreements in connection with the loan and creation of security in relation thereto, if any, with the customer. Margin money and other charges, if any, are collected prior to loan disbursements. The disbursing officer retains evidence of the applicant’s acceptance of the

terms and conditions of the loan as part of the loan documentation.

Prior to the loan disbursement, our concerned officer ensures that a Know Your Customer, (“KYC”), checklist is completed by the applicant. The concerned officer verifies such information provided and includes the records in the relevant loan file. The officer is also required to ensure that the contents of the loan documents are explained in detail to the customer either in English or in the local language of the customer. The customer is provided with a copy of the loan documents executed by him. Further although our customers have the option of making payments by cash or cheque, we may require the applicant to submit post-dated cheques covering an initial period prior to any loan disbursement.

Loan administration and monitoring

The customer (and guarantor, if any) execute(s) the security creation documents and the loan agreement setting out the terms of the loan. A loan repayment schedule is attached as a schedule to the loan agreement, which generally sets out periodical repayment terms. Repayments are made in periodical instalments. Loans disbursed are recovered from the customer in accordance with the loan terms and conditions agreed with the customer. We track loan repayment schedules of our customers on a monthly basis, based on the outstanding tenure of the loans, the number of instalments due and defaults committed, if any. This data is analysed based on the loans disbursed and location of the customer. All recovery of amounts due on loans is managed internally by us. We ensure complete focus on all stages of the collections process. We monitor the completeness of documentation, creation of security etc. through regular visits to the business outlets by our regional as well as head office executives and internal auditors. All customer accounts are reviewed on a regular basis.

Our Company believes that close monitoring of debt servicing efficiency enables us to maintain high recovery ratios and maintain satisfactory asset quality.

MICROFINANCE

Our microfinance operations entail providing micro credit lending to our customers who are predominantly located in rural and semi-urban areas of our targeted geographies in India and the purpose of loans sanctioned to them is mainly for utilisation in small businesses or for other income generating activities but not for personal consumption. Primarily, we utilise a village centred, group lending model to provide unsecured loans to our members. This model relies on a form of ‘social collateral’ and ensures credit discipline through peer support within the group. This model presupposes our members being prudent in conducting their financial affairs and prompt in repaying their outstanding borrowings. As a deterrent, any instance of failure to make timely loan repayments by an individual borrower prevents the other members in the group from making any further borrowings from us, in the future. Therefore, the JLGs tend to employ peer support to encourage the delinquent borrower to make timely repayments or often repay on behalf of a defaulting borrower, effectively providing an informal joint guarantee on the sanctioned loan.

PORTFOLIO MANAGEMENT, COLLECTION AND RECOVERY PROCESSES

Our Company manages the portfolio management and collection processes in-house. We have on-roll collection personnel across branches to ensure timely collection of dues. As part of our collection process we have tele-calling through which calls to all customers are made before the due-dates. In-case of non-payment the team initiates collection calling for dues. We utilise our branch personnel for collection of payment. Further, for effective recovery management, all early delinquent customers are management by a dedicated team which undertakes methodical customer visits for recovery of dues. In cases where customers are unable to make payments and move to higher delinquency levels, a specified team of collection officers including branch managers, regional managers and other such officials are deployed who manage deep delinquent accounts. In addition to customer visits, this team utilises available legal tools for attachment of properties, for re-payment of dues and legal arbitration proceedings.

Risk Management

Risk management forms an integral part of our business as we are exposed to various risks relating to the Gold Loan business. The objective of our risk management systems is to measure and monitor the various risks, we are subject to and to implement policies and procedures to address such risks suitably. We intend to continue to

improve our operating processes and risk management systems which will further enhance our ability to manage the risks inherent to our business.

Asset and Liability Management (“ALM”)

Our business operations require steady flow of working capital and hence managing the day to day liquidity becomes a critical function. The ALM, amongst other functions, is concerned with risk management, providing a comprehensive as well as a dynamic framework for measuring, monitoring and managing liquidity and interest rate risk. The ALM function also alters the asset-liability portfolio in order to manage risks. The ALM also monitors interest rate sensitivity in our portfolio and takes pre-emptive steps to mitigate any potential liquidity and interest rate risks.

Credit Risk

Credit risk is the possibility of loss due to the failure of any counterparty abiding by the terms and conditions of any financial contract with us. We aim to reduce the aforesaid credit risk through a rigorous loan approval and collateral appraisal process, as well as a strong NPA monitoring and collection strategy. This risk is diminished because the gold jewellery used as collateral for our loans can be readily liquidated, and there is only a remote possibility of recovering less than the amounts due to us in light of the 25 % margin retained on the value of the gold jewellery collateral. However, a sustained decrease in the market price of gold can cause a decrease in the size of our loan portfolio and our interest income.

Operational Risk

Operational risk is broadly defined as the risk of direct or indirect loss due to the failure of systems, people or processes, or due to certain other external events. We have instituted a series of checks and balances, including an operating manual, and both internal and external audit reviews. Although we disburse loans in a relatively short period of time, we have clearly defined appraisal methods as well as KYC compliance procedures in place to mitigate operational risks. Any loss on account of failure by employees to comply with defined appraisal mechanism is recovered out of their variable incentive. We also have detailed guidelines on movement and security measures of cash or gold. We are in the process of introducing centralised software which automates inter branch transactions, enabling branches to be monitored centrally and thus reducing the risk of un-reconciled entries. In addition, we are in the process of installing surveillance cameras across our various branches, and subscribe to insurance to cover employee theft or fraud and burglary. Our internal audit department and our centralised monitoring systems assist in the management of operational risk.

Financial Risk

Our business is cash intensive and requires substantial funds, on an ongoing basis to finance the gold loan portfolio and to grow it. Any disruption in the funding sources might have an adverse effect on our liquidity and financial condition. Our Company is proactively pursuing a system of identifying and accessing newer and cheaper sources of funds, to finance the loan book and to grow the business. Our Asset Liability Committee meets regularly and reviews the liquidity position of our Company and ensures availability of sufficient funding in advance.

Market Risk

Market risk refers to potential losses arising from the movement in market values of interest rates in our business. The objective of market risk management is to avoid excessive exposure of our earnings to loss. The majority of our borrowings, and all the loans we make, are at fixed rates of interest. Thus, presently, our interest rate risk is minimal.

Our Risk Management Policy

In order to address the risks that are inherent to our business, we have developed a risk management architecture that includes a risk management committee, internal audit department, vigilance department and a risk management department. Our Risk Management Committee, which is led by one of our Directors, oversees our risk management policies, which help us to identify, measure, monitor and mitigate the various risks that we face in our businesses.

Internal Audit Department

Our internal audit department assists in the management of operational risk using our centralised monitoring systems. Separate divisions of our internal audit department are in place to handle the audit of the departments of the corporate office and those of the branch offices. The audits of our branches are divided into two categories: (i) Audit and (ii) Inspection. Branch audit is carried out quarterly with the focus on the verification of documents, accounts, performance and compliance. In addition, an incremental high value loan check is carried out by regional managers as part of their periodical branch inspection.

Vigilance Department

We have an internal vigilance department for undertaking surprise inspections of high/medium risk branches and other branches or on the basis of any report or detection of serious deviations or irregularities. The vigilance undertakes the responsibility of visiting branches to oversee the implementation of risk mitigation initiatives and improvements in customer service.

Risk Management Audit

Our branch auditors also carry out a system driven risk audit on certain identified key risk parameters. These are keyed into the system and alerts are sent to branch controllers and top management in case the risk weight given under a specific parameter goes beyond the prefixed tolerance levels. In all such cases, the concerned branches are inspected by the branch controllers or top management personnel depending on the severity of risk and immediate remedial actions are initiated.

ALM Organisation

The Asset - Liability Committee (ALCO) is responsible for ensuring adherence to the limits set by the Board as well as for deciding the business strategy of our Company (on the assets and liabilities sides) in line with our Company's budget and decided risk management objectives.

The business and risk management strategy of our Company will ensure that our Company operates within the limits/parameters set by the Board. The business issues that an ALCO would consider, inter alia, includes product pricing, desired maturity profile and mix of the incremental assets and liabilities, prevailing interest rates offered by other peer NBFCs for the similar services/product, etc. In addition to monitoring the risk levels of our Company, the ALCO reviews the results of and progress in implementation of the decisions made in the previous meetings. The ALCO would also articulate the current interest rate view of our Company and base its decisions for future business strategy on this view.

The frequency of holding ALCO meetings will be quarterly.

Liquidity Risk Management

Our ALCO measures not only the liquidity position of our Company on an ongoing basis but also examines how liquidity requirements are likely to evolve under different assumptions. Experience shows that assets commonly considered as liquid, like Government securities and other money market instruments, could also become illiquid when the market and players are unidirectional. Therefore, liquidity has to be tracked through maturity or cash flow mismatches. For measuring and managing net funding requirements, the use of a maturity ladder and calculation of cumulative surplus or deficit of funds at selected maturity dates is adopted as a standard tool. The format of the **Statement of Structural Liquidity** as prescribed by RBI may be used for this purpose.

The Maturity Profile based on ALM – II could be used for measuring the future cash flows of company in different time buckets. The time buckets, may be distributed as under:

- (i) 1 day to 30/31 days (One month)
- (ii) Over one month and up to 2 months
- (iii) Over 2 months and up to 3 months
- (iv) Over 3 months and up to 6 months
- (v) Over 6 months and up to 1 year
- (vi) Over 1 year and up to 3 years
- (vii) Over 3 years and up to 5 years

(viii) Over 5 years

The Statement of Structural Liquidity shall be prepared by placing all cash inflows and outflows in the maturity ladder according to the expected timing of cash flows. A maturing liability will be a cash outflow while a maturing asset will be a cash inflow. While determining the likely cash inflows/outflows, company will have to make a number of assumptions according to their asset - liability profiles. While determining the tolerance levels, the company may take into account all relevant factors based on their asset-liability base, nature of business, future strategy, etc.

In order to enable the company to monitor their short-term liquidity on a dynamic basis over a time horizon spanning from 1 day to 6 months, company will estimate their short-term liquidity profiles on the basis of business projections and other commitments for planning purposes. An indicative format ALM – I issued by RBI for estimating ‘Short-term Dynamic Liquidity’ will be used for the said purpose.

Interest Rate Risk (IRR)

The operational flexibility given to NBFCs in pricing most of the assets and liabilities imply the need for the financial system to hedge the Interest Rate Risk. Interest Rate Risk is the risk where changes in market interest rates might adversely affect an NBFC's financial condition. The changes in interest rates affect our Company. The immediate impact of changes in interest rates is on our Company’s earnings (i.e. reported profits) by changing its Net Interest Income (NII). As such our Company is into funding of loans which are always fixed rate loans. The company manages risk on NII by pricing its loan products to customers at a rate which covers Interest Rate Risk. The risk from the earnings perspective can be measured as changes in the NII or Net Interest Margin (NIM). Measurement of such risk is done at the time of deciding rates to be offered to customers. Once interest rate risk is measured by the ALCO, lending rates are finalised. RBI has prescribed ALM – III for the purpose of Interest Rate Risk Monitoring and our Company may use the same for the purpose of measurement and monitoring of interest rate risk.

Non-performing Assets (NPA)

The RBI Master Directions require that every non-deposit taking NBFC shall, after taking into account the degree of well-defined credit weaknesses and extent of dependence on collateral security for realisation, classify its lease/hire purchase assets, loans and advances and any other forms of credit into the following classes:

- i. Standard assets;
- ii. Sub-standard assets;
- iii. Doubtful assets; and
- iv. Loss assets.

Further, the class of assets referred to above shall not be upgraded merely as a result of rescheduling, unless it satisfies the conditions required for an upgrade. The auction shall be announced to the public by issuing advertisements in at least two newspapers, one in vernacular language and another in national daily newspaper, describing the date of auction, venue of auction, and the details of gold etc. Auction will be conducted by an approved auctioneer appointed by the Board of Directors of our Company. Appointment of an Auctioneer

As per the revised RBI guidelines, our Company or its Promoters cannot participate in the auction. Qualified and experienced auctioneers are to be appointed by our Company to carry out the auction on behalf of the company.

Capital Adequacy Ratio

As per the Master Directions, every NBFC-ND-SI including us are subject to capital adequacy requirements. Currently, we are required to maintain a minimum capital ratio consisting of Tier I and Tier II capital which shall not be less than 15% of its aggregate risk weighted assets on balance sheet and of risk adjusted value of off-balance sheet items. Further, we need to maintain a Tier I capital of 12%. Also, the total of Tier II capital, at any point of time, shall not exceed one hundred percent of Tier I capital. Additionally, we are required to transfer up to 20% of our annual profit to a reserve fund and make provisions for NPAs. We had a capital adequacy ratio of 16.37%, 16.68%, 18.31% and 19.13% on September 30, 2017 March 31, 2017, March 31, 2016 and March 2015, respectively.

We have satisfied the minimum capital adequacy ratios prescribed by the RBI for the financial year ended March 31, 2017.

Technology

We use information technology as a strategic tool for our business operations to improve our overall productivity and efficiency. We believe that through our information systems which are currently in place, we are able to manage our operations efficiently, market effectively to our target customers, and effectively monitor and control risks. We believe that this system has improved customer service by reducing transaction time and has allowed us to manage loan collection efforts better and to comply with regulatory record-keeping and reporting requirements. All our branches are computerised. A need was felt for a centralised IT platform for our continued aggressive growth along with risk management. Accordingly, we are in the process of introducing new software to improve the operational efficiency.

Source of funding

Please refer to sections titled “Financial Statements” and “Financial Indebtedness” on pages 107 and 109.

We have depended on working capital limits from bank and issuance of secured and unsecured non-convertible debentures through private placement as primary source of funding. We have also made public issue of secured and unsecured non-convertible debentures.

We also raise capital by issuing equity shares from time to time particularly to our Promoters.

Security threats and measures taken to mitigate them

The principal security risks to our operations are robbery and employee theft or fraud. We have extensive security and surveillance systems and dedicated security personnel to counter external security threats. To mitigate internal threats, we undertake careful pre-employment screening, including obtaining references before appointment. We also started installing surveillance cameras across our branches. To protect against robbery, all branch employees work behind wooden, glass and steel counters, and the back office, strong room/safe and computer areas are locked and closed to customers. We also keep the pledged gold in joint custody. While we provide around the clock armed security guards for risk prone branches, the majority of our branches do not require security guards as the gold jewellery are stored securely in strong rooms. Since we handle high volumes of cash and gold jewellery at our locations, daily monitoring, spot audits and immediate responses to irregularities are critical to our operations. We have an internal auditing program that includes unannounced branch audits and cash counts at randomly selected branches.

Competition

We face competition from banks, NBFCs and other unregulated/unorganised money lenders. Our Board believes that we can achieve economies of scale and increased operating efficiencies by increasing the number of branches under operation and proven operating methods. We believe that the primary elements of competition are the quality of customer service and relationship management, branch location and the ability to lend competitive amounts at competitive rates. In addition, we believe the ability to compete effectively will be based increasingly on strong management, regional market focus, automated management information systems and access to capital.

Report on Review of Financial Statements

To

The Board of Directors
Kosamattam Finance Ltd
Kosamattam Mathew K Cherian Building,
Market Junction, ML Road,
Kottayam -686001
Kerala

We have reviewed the accompanying statement of unaudited financial results of Kosamattam Finance Limited for the period ended 30th September, 2017. This statement is the responsibility of the Company's Management and has been approved by the Board of Directors. Our responsibility is to issue a report on these financial statements based on our review.

We conducted our review in accordance with the Standard on Review Engagement (SRE) 2400, "Engagements to Review Financial Statements" issued by the Institute of Chartered Accountants of India. This standard requires that we plan and perform the review to obtain moderate assurance as to whether the financial statements are free of material misstatement. A review is limited primarily to inquiries of company personnel and analytical procedures applied to financial data and thus provides less assurance than an audit. We have not performed an audit and accordingly, we do not express an audit opinion.

Based on our review conducted as above, nothing has come to our attention that causes us to believe that the accompanying statement of unaudited financial results prepared in accordance with applicable accounting standards and other recognized accounting practices and policies has not disclosed the information required to be disclosed in terms of Regulation 52 of the Listing Regulations including the manner in which it is to be disclosed, or that it contains any material misstatement or that it has not been prepared in accordance with the relevant prudential norms issued by the Reserve Bank of India in respect of income recognition, asset classification, provisioning and other related matters.

2.1 Basis of Preparation & Presentation of Financial statements.

The Financial Statements of the Company have been prepared in accordance with Generally Accepted Accounting Principles in India (Indian GAAP). The Company has prepared these Financial Statements to comply in all material respects with Accounting Standards notified under The Companies (Accounting Standards) Rules, 2006 (as amended) and the relevant provisions of the Companies Act, 2013 and the guidelines issued by the Reserve bank of India as applicable to a Systemically Important Non-Deposit Accepting NBFC. The Financial Statements have been prepared on an accrual basis and under the historical cost convention except for interest on non-performing assets which are recognized on realization basis. The Accounting Policies adopted in the preparation of Financial Statements are consistent with those of previous year.

The preparation of financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

During the year ended March 31, 2017, the Company has complied with the requirements of Schedule III of Companies Act 2013 for the preparation and presentation of its financial statement. The Company has also reclassified the previous year figures in accordance with the requirements applicable in the current year.

2.2 Tangible Fixed Assets

Fixed Assets are stated at cost less accumulated depreciation. The cost includes purchase consideration, financing costs till commencement of commercial production and other directly attributable costs incurred to bring an Asset to its working condition for its intended use. Subsidy towards specific assets is reduced from the cost of fixed assets. Fixed assets taken on Finance Lease are capitalized. The costs of Assets not ready for use as at the Balance Sheet date are disclosed under Capital Work-In-Progress.

2.3 Depreciation on Tangible Fixed Assets

Depreciation on Fixed Assets is provided based on the useful life of the asset in the manner prescribed in Schedule II to the Companies Act, 2013. The Company has used the following useful life to provide depreciation on its tangible assets.

Asset	Useful Life
Building	60 Years
Building-Compound Wall and Well	5 Years
Furniture & Fittings	10 Years
Electrical Fittings	10 Years
Computer	3 Years
Vehicles	8 Years

Pursuant to the enactment of Companies Act, 2013, the Company has applied the estimated useful lives as specified in schedule II. Accordingly the unamortized carrying value is being depreciated, amortized over the revised/remaining useful lives.

2.4 Intangible Asset

Intangible Assets are recorded at the consideration paid for acquisition less accumulated amortization and accumulated impairment, if any. Intangible assets are amortized over their estimated useful life subject to a maximum period of 10 years on straight line basis, commencing from the date the asset is available to the Company for its use.

Expenditure for acquisition and implementation of software system is recognized as part of the intangible asset and amortized on straight line basis over a period of 10 years being the maximum period available for writing off of intangible asset.

2.5 Borrowing Costs

General and specific borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. All other borrowing costs are recognized in the Statement of Profit and Loss in the period in which they are incurred.

2.6 Impairment

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating units (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken in to account, if available. If no such transactions can be identified, an appropriation valuation model is used. After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.

2.7 Leases

Leases where the lessor effectively retains substantially all risks and benefits of ownership of the leased term are classified as operating leases. Operating lease payments in respect of non-cancellable leases are recognized as an expense in the profit and loss account on a straight-line basis over the lease term.

2.8 Investments

Investments that are readily realizable and are intended to be held for not more than one year from the date, on which such investments are made, are classified as current investment. All other investments are classified as long term investments. Current investments are carried at cost or fair value, whichever is lower. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize decline other than temporary in the value of the investments.

2.9 Revenue Recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. In a situation where management believes that the recovery of interest is uncertain due to change in the price of the gold or otherwise, the Company recognizes income on such loans only to the extent it is confident of recovering interest from its customers through sale of underlying security or otherwise.

Interest income on loans given is recognized under the internal rate of return method. Such interests, where instalments are overdue in respect of non-performing asset are recognized on realization basis. Any such income recognized and remaining unrealized after the instalments become overdue with respect to non-performing asset is reversed.

Revenue from fee-based activities is recognized as and when services are rendered.

Interest on deposit is recognized on a time proportion basis taking in to account the amount outstanding and the rate applicable.

2.10 Employee Benefits

Short term Employee Benefits

All employee benefits payable wholly within twelve months of rendering the service are classified as Short term employee benefits. These benefits include benefits like salaries, wages, short term compensated absence such as paid

annual leave and sickness leave. The undiscounted amount of short term employee benefits expected to be paid in exchange for the services rendered by employees are recognized as an expense during the period.

2.11 Foreign currency transaction

On initial recognition, all foreign currency transactions are recorded by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

As at the reporting date, non-monetary items which are carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction. All non-monetary items which are carried at fair value or other similar valuation denominated in a foreign currency are reported using the exchange rates that existed when the values were determined.

All monetary assets and liabilities in foreign currency are restated at the end of accounting period. A monetary asset or liability is termed as a long-term foreign currency monetary item, if the asset or liability is expressed in a foreign currency and has a term of 12 months or more at the date of origination of the asset or liability.

Exchange differences on restatement/settlement of all other monetary items are recognized in the Statement of Profit and Loss.

2.12 Taxes on Income

Tax expense comprises current and deferred tax. Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the income-tax Act, 1961 enacted in India.

Deferred tax charge or credit reflects the tax effects of timing difference between accounting income and taxable income for the period. The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognized using the tax rates that have been enacted or substantively enacted by the Balance Sheet date. Deferred tax assets are recognized only to the extent there is reasonable certainty that the assets can be realized in future; however, where there is unabsorbed depreciation or carry forward losses, deferred tax assets are recognized, only if there is virtual certainty of realization of such assets. Deferred tax assets are reviewed at each Balance Sheet date and are written-down or written-up to reflect the amount that is reasonably/ virtually certain (as the case may be) to be realized.

Deferred Tax Assets and deferred tax liabilities are offset when there is a legally enforceable right to set off assets against liabilities representing current tax and where the deferred tax assets and the deferred tax liabilities relate to taxes on income levied by the same governing taxation laws.

2.13 Provisions and Contingent Liabilities

Provisions: Provisions are recognized when there is a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are measured at the best estimate of the expenditure required to settle the present obligation at the Balance sheet date and are not discounted to its present value.

Provision policy for gold loan and other loan portfolios: Company provides for non-performing loans and advances as mentioned in Para 13 of Systemically Important Non-Banking Financial (Non-Deposit Accepting or Holding) Companies Prudential Norms (Reserve Bank) Directions, 2016. Earnings considered in ascertaining the Company's earnings per share is the net profit for the period after deducting preference dividends and any attributable tax thereto for the period. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, other than the conversion of potential equity shares that have changed the number of equity shares outstanding, without a corresponding change in resources. Applicants who have applied for the NCDs, are advised to immediately update their bank account details as appearing on the records of the depository participant. Please note that failure to do so may result in delays in credit of refunds to the applicant at the applicant's sole risk, and the Lead Manager, our Company nor the Registrar to the Issue shall have any responsibility and undertake any liability for the same.

The mode of refund/interest/redemption payments shall be undertaken in the following order of preference:

Where the nominee is a minor, the NCD holder(s) may make a nomination to appoint, in the prescribed manner, any person to become entitled to the NCD(s), in the event of his death, during the minority. A nomination shall stand rescinded upon sale of a NCD by the person nominating. A buyer will be entitled to make a fresh nomination in the manner prescribed. When the NCD is held by two or more persons, the nominee shall become entitled to receive the amount only on the demise of all the holders. Fresh nominations can be made only in the prescribed form available on request at our Registered/Corporate Office or at such other addresses as may be notified by us.

NCD holder(s) are advised to provide the specimen signature of the nominee to us to expedite the transmission of the NCD(s) to the nominee in the event of demise of the NCD holder(s). The signature can be provided in the Application Form or subsequently at the time of making fresh nominations. This facility of providing the specimen signature of the nominee is purely optional.

In accordance with Section 72 of the Companies Act, 2013, any person who becomes a nominee by virtue of the provisions of the same Section, shall upon the production of such evidence as may be required by the Board, elect either:

- to register himself or herself as the holder of the NCDs; or
- to make such transfer of the NCDs, as the deceased holder could have made.

Further, the Board may at any time give notice requiring any nominee to choose either to be registered himself or herself or to transfer the NCDs, and if the notice is not complied with, within a period of 90 days, the Board may thereafter withhold payment of all interests or redemption amounts or other monies payable in respect of the NCDs, until the requirements of the notice have been complied with.

For nominations made in dematerialised mode, there is no need to make a separate nomination with our Company. Nominations registered with the respective Depository Participant of the applicant would prevail. If the investors require changing their nomination, they are requested to inform their respective Depository Participant.

Succession

Where NCDs are held in joint names and one of the joint NCD Holder dies, the survivor(s) will be recognised as the NCD Holder(s). It will be sufficient for our Company to delete the name of the deceased NCD Holder after obtaining satisfactory evidence of his death. Provided, a third person may call on our Company to register his name as successor of the deceased NCD Holder after obtaining evidence such as probate of a will for the purpose of proving his title to the NCDs. In the event of demise of the sole or first holder of the NCDs, our Company will recognise the executors or administrator of the deceased NCD Holders, or the holder of the succession certificate or other legal representative as having title to the NCDs only if such executor or administrator obtains and produces probate or letter of administration or is the holder of the succession certificate or other legal representation, as the case may be, from an appropriate court in India. Our Directors, in their absolute discretion may, in any case, dispense with production of probate or letter of administration or succession certificate or other legal representation. In case of death of NCD Holders who are holding NCDs in dematerialised form, third person is not required to approach the Company to register his name as successor of the deceased NCD holder. He shall approach the respective Depository Participant of the NCD Holder for this purpose and submit necessary documents as required by the Depository Participant.

In this regard, RBI had issued a supervisory letter dated September 8, 2016 which was responded to by our Company vide its letter dated October 5, 2016. In the SCN, the RBI asked our Company to show cause as to why a penalty of ₹5,00,000 for contravention of KYC norms and further penalty of ₹25,000 per day during which such contravention subsisted, should not be levied on our Company, under Section 58 G(1)(b) read with Section 58-B(5)(aa) of the RBI Act. Our Company vide its letter dated May 13, 2017 (“**Reply**”), responded to the allegations levied by the RBI in the SCN and submitted that two of the three branches of our Company, where the inspection had taken place were unable to produce the relevant applications and KYC documents, on time although the same were available with our Company, on account of shifting of the said documents to our regional office in Kottayam and from there to other premises. Our Company further informed the RBI that the relevant documents were maintained at our Company’s head office and that our Company had also developed a software to track the application and KYC forms of its privately placed debenture holders and that the process of digitisation was ongoing. Subsequently, RBI vide its letter dated June 19, 2017, directed our Company to submit all necessary documents, including offer documents, information memorandums, application forms, KYC details and other information to the RBI. Our Company vide its letter dated July 12, 2017 informed the RBI that on account of our Company’s statutory auditors being replaced, our Company needed an extension of time to comply with RBI’s directions. Tax Litigations

Direct Tax

1. The Commissioner of Income Tax (Central), Kochi (“**CITK**”) filed a writ petition (c) bearing no. 23856/2013 dated August 28, 2013 (“**Writ Petition**”), before the High Court of Kerala against the order dated March 25, 2013 (“**Order**”) passed by the Income Tax Settlement Commission, Chennai (“**Commission**”) for the assessment years 2004-05 to 2010-11, granting immunity to our Company from penalty and prosecution. Aggrieved by the Order, the Writ Petition was filed by CITK inter-alia on the ground that the Commission has no authority to grant immunity to our Company from penalty and prosecution unless our Company makes full and true disclosure of its income, manner in which it was derived and cooperates with the Commission in the proceedings. The CITK further alleged that the income admitted by our Company was less than the income quantified by the Commission and hence full and true disclosure wasn’t made and thus the Order passed by the Commission was against law. Further, the CITK has prayed for the issuance of writ of certiorari or any other appropriate order quashing the Order to the extent that it granted immunity to our Company from prosecution and penalty. The matter is currently pending.
2. The Assistant Commissioner of Income Tax, Kottayam (“**ACIT**”) passed an order dated December 31, 2016, directing our Company to pay an amount of ₹ 11.64 lacs as income tax for the Assessment Year 2014-2015. (“**Order**”). The amount was calculated on the basis of depreciation allegedly claimed at higher rates by our Company, an alleged mismatch between sales turnover reported in the audit report and income tax return, and an alleged mismatch between the income/receipt credited to the profit and loss account considered under other heads of income and income from heads of income other than business/profession. Against this Order, our Company filed an application dated January 16, 2017 before the ACIT for rectification of mistake (“**Application**”) stating that no tax demand should have been raised because the returned income had been accepted by the ACIT. The Application further stated that the errors had occurred due to the fact that the ACIT had calculated interest under Section 234A of the Income Tax Act, 1961 without taking into account the fact that the date for filing the income tax return for the Assessment Year 2014-2015 had been extended to November 30, 2014 as per an order issued by the Ministry of Finance, Government of India. Further, the ACIT had also not considered the fact that the due date for the payment of advance tax for the third quarter had been extended to December 17, 2013, and had calculated interest under Section 234B and 234C of the Income Tax Act, 1961 without considering the amount of ₹ 175 lacs that had been paid as advance tax by our Company on December 17, 2013. The matter is currently pending.
3. The Commissioner of Income Tax (Central), Kochi (“**CIT**”) passed an order dated November 30, 2016 under Section 263 of the Income Tax Act, 1961 (“**IT Act**”) directing the Assistant Commissioner of Income Tax, Central Circle, Kottayam (“**AO**”) to verify a deduction amounting to ₹1,23,07,446 claimed by the Company towards discount allowed to debenture holders during the AY 2012-13. The Assistant Commissioner of Income Tax, Central Circle, Kottayam (“**AO**”) passed an assessment order dated August 31, 2017 under Section 263 of the IT Act (“**Order**”) giving effect to the direction of the CIT in relation to deduction amounting to ₹1,23,07,446 claimed by the Company towards discount allowed to debenture holders during the AY 2012-13. In the Order, the AO disallowed the deduction on the grounds that certain debenture holders (out of the list of entire debenture holders) had not confirmed the debenture subscription in a prescribed proforma sent to them, as notices under Section 133(6) of the IT Act and in certain cases, as summons under Section 131 of the IT Act and some debenture holders who were served notices and summons did not respond at all. Further the Order also states that there was an instance of a cash deposit of ₹20,00,000 on November 26, 2011, in the Company’s bank account with Kilimanoor branch which has been accounted by the Company towards subscription of debentures. The subscription amount relating to all these debenture holders aggregating to ₹33,66,40,000 was added to the income of the Company under Section 68 of the IT Act, and consequently, a demand of ₹18,95,72,090 was raised on the Company. The Company has filed an appeal dated September 28, 2017 before the Commissioner of Income Tax (Appeals) (“**CIT – A**”) challenging the Order on inter-alia grounds that the assessment order is violative of principles of natural justice, additions made under Section 68 were beyond jurisdiction of the AO as well as grounds on merits justifying the claim of deduction of expenditure. Separately, the Company approached the High Court of Kerala (“**High Court**”) requesting for stay of demand. The High Court has passed an order dated September 12, 2017 directing the

CIT – A to decide the stay application within two months of receipt of a certified copy of the High Court order. The CIT- A passed an order dated December 27, 2017 granting a stay on recovery of the demand amount. The matter is currently pending.

The following description is a summary of certain sector specific laws and regulations in India, which are applicable to our Company. The information detailed in this chapter has been obtained from publications available in the public domain. The regulations set out below may not be exhaustive, and are only intended to provide general information to the investors and are neither designed nor intended to substitute for professional legal advice. The statements below are based on the current provisions of the Indian law, and the judicial and administrative interpretations thereof, which are subject to change or modification by subsequent legislative, regulatory, administrative or judicial decisions.

The major regulations governing our Company are detailed below:

We are a non-deposit taking (which does not accept public deposits), systemically important, NBFC. As such, our business activities are regulated by RBI Regulations applicable to non-public deposit accepting NBFCs (“**NBFC-ND**”).

As of September 30, 2017, the RBI has issued an updated *Master Direction - Non-Banking Financial Company - Systemically Important Non-Deposit taking Company and Deposit taking Company (Reserve Bank) Directions, 2016, dated September 1, 2016 as amended*, (“**Master Directions**”) applicable to all NBFC-NDSI’s.

Regulations governing NBFCs

As per the RBI Act, a financial institution has been defined as a company which includes a non-banking institution carrying on as its business or part of its business the financing activities, whether by way of making loans or advances or otherwise, of any activity, other than its own and it is engaged in the activities of loans and advances, acquisition of shares/stock/bonds/debentures/securities issued by the Government of India or other local authorities or other marketable securities of like nature, leasing, hire-purchase, insurance business, chit business but does not include any institution whose principal business is that of carrying out any agricultural or industrial activities or the sale/purchase/construction of immovable property.

As per prescribed law any company that carries on the business of a non-banking financial institution as its ‘principal business’ is to be treated as an NBFC. The term ‘principal businesses has not been defined in any statute, however, RBI has clarified through a press release (Ref. No. 1998-99/1269) issued in 1999, that in order to identify a particular company as an NBFC, it will consider both the assets and the income pattern as evidenced from the last audited balance sheet of the company to decide a company’s principal business. The company will be treated as an NBFC if its financial assets are more than 50 percent of its total assets (netted off by intangible assets) and income from financial assets should be more than 50 percent of the gross income. Both these tests are required to be satisfied in order to determine the principal business of a company.

Every NBFC is required to submit to the RBI a certificate, from its statutory auditor within one month from the date of finalisation of the balance sheet and in any case, not later than December 30 of that year, stating that it is engaged in the business of non-banking financial institution requiring it to hold a certificate of registration.

NBFCs are primarily governed by the RBI Act and the Master Directions. In addition to these regulations, NBFCs are also governed by various circulars, notifications, guidelines and directions issued by the RBI from time to time.

Although by definition, NBFCs are permitted to operate in similar sphere of activities as banks, there are a few important and key differences. The most important distinctions are:

- An NBFC cannot accept deposits repayable on demand – in other words, NBFCs can only accept fixed term deposits. Thus, NBFCs are not permitted to issue negotiable instruments, such as cheques which are payable

on demand; and

- NBFCs are not allowed to deal in foreign exchange, even if they specifically apply to the RBI for approval in this regard.

Section 45-IA of the RBI Act makes it mandatory for every NBFC to get itself registered with the Reserve Bank in order to be able to commence any of the aforementioned activities.

Further, an NBFC may be registered as a deposit accepting NBFC (“**NBFC-D**”) or as a non-deposit accepting NBFC (“**NBFC-ND**”). NBFCs registered with RBI are further classified as:

- Asset finance companies;
- Investment companies;
- Systemically Important Core Investment Company;
- Loan companies and/or
- Infrastructure finance companies.
- Infrastructure debt fund - NBFCs;
- NBFC - micro finance institutions;
- NBFC –Factors;
- Mortgage guarantee companies; and/or
- NBFC- non-operative financial holding company

Our Company has been classified as an NBFC-ND-SI.

Systemically Important NBFC-NDs

The RBI in its notification (RBI/2014-15/520 DNBR (PD) CC.No.024/03.10.001/2014-15) dated March 27, 2015 revised the threshold for defining systemic significance for NBFCs-ND in the light of the overall increase in the growth of the NBFC sector. NBFCs-ND-SI will henceforth be those NBFCs-ND which have asset size of ₹50,000 lakhs and above as per the last audited balance sheet. Moreover, all NBFCs-ND with assets of ₹50,000 lakhs and above, irrespective of whether they have accessed public funds or not, shall comply with prudential requirements as applicable to NBFCs-ND-SI. NBFCs-ND-SI is required to comply with conduct of business regulations if customer interface exists.

All systemically important NBFCs are required to maintain a minimum Capital to Risk-Weighted Assets Ratio (“**CRAR**”) of 15%.

Loan-to-value guidelines

The RBI vide the Master Directions, directed all NBFCs to: (i) maintain a loan-to-value ratio not exceeding 75% for loans granted against the collateral of gold jewellery and; (ii) disclose in their balance sheet the percentage of such loans to their total assets.

Further, NBFC’s are also required to not grant any advance against bullion / primary gold, gold bullion, gold jewellery, gold coins, units of Exchange Traded Funds (ETF) and units of gold mutual fund. NBFCs primarily engaged in lending against gold jewellery (such loans comprising 50% or more of their financial assets) are required to maintain a minimum Tier I capital of 12.00%.

Rating of NBFCs

Pursuant to the RBI Master Directions, all NBFCs with an asset size of ₹1,000 million are required to, as per RBI instructions to, furnish information about downgrading or upgrading of the assigned rating of any financial product issued by them within 15 days of a change in rating.

Prudential Norms

The Master Directions amongst other requirements prescribe guidelines on NBFC-ND regarding income recognition, asset classification, provisioning requirements, constitution of audit committee, capital adequacy requirements, concentration of credit/investment and norms relating to infrastructure loans. Further the

concentration of credit/ investment norms shall not apply to a systemically important non-banking financial company not accessing public funds in India, either directly or indirectly, and not issuing guarantees.

Provisioning Requirements

An NBFC-ND, after taking into account the time lag between an account becoming non-performing, its recognition, the realisation of the security and erosion overtime in the value of the security charged, shall make provisions against sub-Standard Assets, Doubtful Assets and Loss Assets in the manner provided for in the Master Directions.

In the interests of counter cyclicalities and so as to ensure that NBFCs create a financial buffer to protect them from the effect of economic downturns, RBI vide their circular no. DNBS.PD.CC. No.207/ 03.02.002 /2010-11 dated January 17, 2011, introduced provisioning for Standard Assets by all NBFCs. NBFCs are required to make a general provision at 0.25% of the outstanding standard assets. RBI vide their circular no. DNBR (PD) CC No. 037/03.01.001/2014-15 dated June 11, 2015 and the Master Directions has sought to raise the provision for standard assets to 0.40% by March 2018. The provisions on standard assets are not reckoned for arriving at net NPAs. The provisions towards Standard Assets are not needed to be netted from gross advances but shown separately as 'Contingent Provisions against Standard Assets' in the balance sheet. NBFCs are allowed to include the 'General Provisions on Standard Assets' in Tier II capital which together with other 'general provisions/ loss reserves' will be admitted as Tier II capital only up to a maximum of 1.25% of the total risk-weighted assets.

Capital Adequacy Norms

Every systemically important NBFC-ND is required to maintain, with effect from April 1, 2007, a minimum capital ratio consisting of Tier I and Tier II capital of not less than 15% of its aggregate risk weighted assets on balance sheet and of risk adjusted value of off-balance sheet items is required to be maintained. Also, the total of the Tier II capital of a NBFC-MFI shall not exceed 100% of the Tier I capital.

Tier-I Capital, are defined as owned funds as reduced by investment in shares of other NBFCs and in shares, debentures, bonds, outstanding loans and advances including hire purchase and lease finance made to and deposits with subsidiaries and companies in the same group exceeding, in aggregate, 10% of the owned fund and perpetual debt instruments issued by a systemically important NBFC-ND in each year to the extent it does not exceed 15% of the aggregate Tier I capital of such company as on March 31 of the previous accounting year. Further the RBI vide circular dated March 27, 2015 require the NBFCs primarily engaged in the business of lending against gold jewellery (such loans comprising 50% or more of their financial assets) to maintain a minimum Tier I capital of 12%.

Owned Funds, are defined as paid-up equity capital, preference shares which are compulsorily convertible into equity, free reserves, balance in share premium account; capital reserve representing surplus arising out of sale proceeds of asset, excluding reserves created by revaluation of assets; less accumulated loss balance, book value of intangible assets and deferred revenue expenditure, if any.

Further, this is also required to be made available on the NBFCs website or published in newspapers and is required to be updated in the event of any change therein. Further, the rate of interest would have to be an annualised rate so that the borrower is aware of the exact rates

that would be charged to the account.

These include attachment and sale of movable and immovable property of the defendant, arrest of the defendant and his detention in prison and appointment of receiver for management of the movable or immovable properties of the defendant.

The DRT Act also provides that a bank or public financial institution having a claim to recover its debt, may join an ongoing proceeding filed by some other bank or public financial institution, against its debtor, at any stage of the proceedings before the final order is passed, by making an application to the DRT.

Securitisation and Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002 (“SARFAESI”)

The SARFAESI Act regulates the securitization and reconstruction of financial assets of banks and financial institutions. The SARFAESI Act provides for measures in relation to enforcement of security interests and rights of the secured creditor in case of default.

The RBI has issued guidelines to banks and financial institutions on the process to be followed for sales of financial assets to asset reconstruction companies. These guidelines provide that a bank or a financial institution or an NBFC may sell financial assets to an asset reconstruction company provided the asset is an NPA. A bank or financial institution or NBFC may sell a financial asset only if the borrower has a consortium or multiple banking arrangements and at least 75% by value of the total loans to the borrower are classified as an NPA and at least 75% by the value of the banks and financial institutions in the consortium or multiple banking arrangement agree to the sale. In addition to the above, a financial asset may be sold by any bank or financial institution where the asset is reported, by the bank financial institution to Central Repository for Information on Large Credit, as an NPA wherein the principal or interest payment is overdue between 61-90 days.

As per the SARFAESI Amendment Act of 2004, the constitutional validity of which was upheld in a recent Supreme Court ruling, non-performing assets have been defined as an asset or account of a borrower, which has been classified by a bank or financial institution as sub-standard, doubtful or loss asset in accordance with directions or guidelines issued by the RBI. In case the bank or financial institution is regulated by a statutory body/authority, NPAs must be classified by such bank in accordance with guidelines issues by such regulatory authority. The RBI has issued guidelines on classification of assets as NPAs. Further, these assets are to be sold on a “without recourse” basis only.

The SARFAESI Act provides for the acquisition of financial assets by Securitization Company or Reconstruction Company from any bank or financial institution on such terms and conditions as may be agreed upon between them. A securitization company or reconstruction company having regard to the guidelines framed by the RBI may, for the purposes of asset reconstruction, provide for measures such as the proper management of the business of the borrower by change in or takeover of the management of the business of the borrower, the sale or lease of a part or whole of the business of the borrower and certain other measures such as rescheduling of payment of debts payable by the borrower; enforcement of security.

Additionally, under the provisions of the SARFAESI Act, any securitisation company or reconstruction company may act as an agent for any bank or financial institution for the purpose of recovering its dues from the borrower on payment of such fee or charges as may be mutually agreed between the parties.

Various provisions of the SARFAESI Act have been amended by the Enforcement of Security Interest and Recovery of Debt Laws and Miscellaneous Provisions (Amendment) Act, 2016 as also the Insolvency and Bankruptcy Code, 2016 (which amended S.13 of SARFAESI). As per this amendment, the Adjudicating Authority under the Insolvency and Bankruptcy Code, 2016 shall by order declare moratorium for prohibiting *inter alia* any action to foreclose, recover or enforce any security interest created by the corporate debtor in respect of its property including any action under the SARFAESI Act

Foreign Investment Regulations

Foreign investment in Indian securities is regulated through the Consolidated FDI Policy and FEMA. The government bodies responsible for granting foreign investment approvals are the concerned ministries/departments of the Government of India and the RBI. Pursuant to the office memorandum dated June 5, 2017, issued by the Department of Economic Affairs, Ministry of Finance, approval of foreign investment under the FDI policy has been entrusted to concerned ministries/departments. In circumstances where there is a doubt as to which department shall act as the Competent Authority, the DIPP shall identify the Competent Authority. The DIPP has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendment to FEMA. In case of any conflict FEMA prevails. The Consolidated FDI Policy consolidates the policy framework in place as on August 27, 2017.

Under the approval route, prior approval from the RBI is required. FDI for the items/activities that cannot be brought in under the automatic route may be brought in through the approval route. Approvals are accorded on the recommendation of the relevant ministry of the GoI.

Foreign exchange in any form can be brought into India freely without limit provided it is declared on the Currency Declaration Form (CDF) on arrival to the Custom Authorities. When foreign exchange brought in the form of currency notes or travellers' cheques does not exceed US \$10,000 or its equivalent and/or the value of foreign currency notes does not exceed US \$5,000 or its equivalent, declaration thereof on CDF is not insisted upon.

Taking out foreign exchange in any form, other than foreign exchange obtained from an authorised dealer or a money changer is prohibited unless it is covered by a general or special permission of the Reserve Bank. Non-residents, however, have general permission to take out an amount not exceeding the amount originally brought in by them, subject to compliance with the provisions of sub-para above.

Authorised Money Changers (AMCs)/franchisees may freely purchase foreign currency notes, coins and traveller's cheques from residents as well as non-residents. Where the foreign currency was brought in by declaring on form CDF, the tenderer should be asked to produce the same. The AMC should invariably insist on production of declaration in CDF.

AMCs may sell Indian Rupees to foreign tourists/visitors against International Credit Cards/International Debit Cards and take prompt steps to obtain reimbursement through normal banking channels.

AMCs may issue certificate of encashment when asked for in cases of purchases of foreign currency notes, coins

and travellers cheques from residents as well as non-residents. These certificates bearing authorised signatures should be issued on the letter head of the money changer and proper record should be maintained.

In cases where encashment certificate is not issued, attention of the customers should be drawn to the fact that unspent local currency held by non-residents will be allowed to be converted into foreign currency only against production of a valid encashment certificate.

AMCs may purchase from other AMCs and ADs any foreign currency notes, coins and encashed travellers' cheques tendered in the normal course of business. Rupee equivalent of the amount of foreign exchange purchased should be paid only by way of crossed account payee cheque/demand draft/bankers' cheque/Pay order.

AMCs may sell foreign exchange up to the prescribed ceiling (currently US \$ 10,000) specified in Schedule III to the Foreign Exchange Management (Current Account Transaction) Rules, 2000 during a financial year to persons resident in India for undertaking one or more private visits to any country abroad (except Nepal and Bhutan). Exchange for such private visits will be available on a self-declaration basis to the traveller regarding the amount of foreign exchange availed during a financial year. Foreign nationals permanently resident in India are also eligible to avail of this quota for private visits provided the applicant is not availing of facilities for remittance of his salary, savings, etc., abroad in terms of extant regulations.

AMCs may sell foreign exchange to persons' resident in India for undertaking business travel or for attending a conference or specialised training or for maintenance expenses of a patient going abroad for medical treatment or check-up abroad or for accompanying as attendant to a patient going abroad for medical treatment/check-up up to the limits as specified in Schedule III to FEMA (Current Account Transactions) Rules, 2000.

AMCs may convert into foreign currency, unspent Indian currency held by non-residents at the time of their departure from India, provided a valid Encashment Certificate is produced.

AMCs may convert at their discretion, unspent Indian currency up to ₹10,000 in the possession of non-residents if, for *bona fide* reasons, the person is unable to produce an Encashment Certificate after ensuring that the departure is scheduled to take place within the following seven days. FFCs may provide facility for reconversion of Indian Rupees to the extent of ₹50,000/- to foreign tourists (not NRIs) against ATM Receipts based on the following documents- Valid passport and visa, ticket confirmed for departure within 7 days, Original ATM slip.

AMCs may issue a cash memo, if asked for, on official letterhead to travellers to whom foreign currency is sold by them. The cash memo may be required for production to emigration authorities while leaving the country.

AMCs may put through transactions relating to foreign currency notes and travellers' cheques at rates of exchange determined by market conditions and in alignment with the ongoing market rates.

AMCs should display at a prominent place in or near the public counter, a chart indicating the rates for purchase/sale of foreign currency notes and travellers' cheques for all the major currencies and the card rates for any day, should be updated, latest by 10:30 a.m.

AMCs should keep balances in foreign currencies at reasonable levels and avoid build-up of idle balances with a view to speculating on currency movements.

Franchisees should surrender foreign currency notes, coins and travellers' cheques purchased only to their franchisers within seven working days.

The transactions between authorised dealers and FFCs should be settled by way of account payee crossed cheques/demand drafts. Under no circumstances should settlement be made in cash.

AMCs may obtain their normal business requirements of foreign currency notes from other AMCs/authorised dealers in foreign exchange in India, against payment in rupees made by way of account payee crossed cheque/demand draft.

Where AMCs are unable to replenish their stock in this manner, they may make an application to the Forex Markets Division, Foreign Exchange Department, Central Office, RBI, Mumbai through an AD Category-I for permission to import foreign currency into India. The import should take place through the designated AD Category-I through whom the application is made.

AMCs may export surplus foreign currency notes/encashed travellers' cheques to an overseas bank through designated Authorised Dealer Category - I in foreign exchange for realisation of their value through the latter. FFCs may also export surplus foreign currency to private money changers abroad subject to the condition that either the realisable value is credited in advance to the AD Category – I bank's nostro account or a guarantee is

issued by an international bank of repute covering the full value of the foreign currency notes/coins to be exported.

In the event of foreign currency notes purchased being found fake/forged subsequently, AMCs may write-off up to US \$ 2000 per financial year after approval of their Top Management after exhausting all available options for recovery of the amount. Any write-off in excess of the above amount, would require the approval of the Regional Office concerned of the Foreign Exchange Department of the Reserve Bank.

Further, provisions regarding the following are also mentioned-

- **Registers and Books of Accounts of Money-changing Business**
- **Submission of Statements to the Reserve Bank**

All AMCs are required to submit their annual audited balance sheet to the respective Regional office of the Reserve Bank for the purpose of verification of their Net Owned Funds along-with a certificate from the statutory auditors regarding the NOF as on the date of the balance sheet. As AMCs are expected to maintain the minimum NOF on an ongoing basis, if there is any erosion in their NOF below the minimum level, they are required to bring it to the notice of the Reserve Bank immediately along with a detailed time bound plan for restoring the Net Owned Funds to the minimum required level.

Insolvency and Bankruptcy Code

The Insolvency and Bankruptcy Code, 2016 (“**Code**”) was passed by the Upper House of the Parliament on May 11, 2016 (shortly after being passed by the Lower House on May 5, 2016). The Code has received the assent of the President of India on May 28, 2016. The Country now has a new legal regime that primarily enables time bound restructuring and bankruptcy of debtors. Some of the primary objectives with which the Code has been conceptualised are:

- a. to consolidate the laws relating to insolvency, reorganisation and liquidation/ bankruptcy of all persons, including companies, individuals, partnership firms and Limited Liability Partnerships (“**LLPs**”) under one statutory umbrella and amending relevant laws;
- b. time bound resolution of defaults and seamless implementation of liquidation/ bankruptcy and maximising asset value;
- c. to encourage resolution as means of first resort for recovery;
- d. creating infrastructure which can eradicate inefficiencies involved in bankruptcy process by introducing National Company Law Tribunal (“**NCLT**”), Insolvency Resolution Professional Agencies (“**IPAs**”), Insolvency Professionals (“**IPs**”) and Information Utilities (“**IUs**”).

In order to cover bankruptcy of individuals, the Code will repeal the Presidency Towns Insolvency Act, 1909 and Provincial Insolvency Act, 1920. Additionally, the Code will amend 11 statutes including, inter alia, the

Companies Act, 2013 (Companies Act) Sick Industrial Companies (Special Provisions) Repeal Act, 2003 (“SICA”), Limited Liability Partnership Act, 2008 (“LLP Act”), Securitisation and Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002 (“SARFAESI”) and Recovery of Debts Due to Banks and Financial Institutions Act, 1993 (“RDDBFI”). The Code seeks to establish an Insolvency and Bankruptcy Board of India (Board) which will function as the regulator for all matters pertaining to insolvency and bankruptcy. The Board will exercise a range of legislative, administrative and quasi-judicial functions.

The Code specifies 2 different adjudicating authorities (the Adjudicating Authority) which will exercise judicial control over the insolvency process as well as the liquidation process. In case of companies, LLPs and other limited liability entities (which may be specified by the Central Government from time to time), the NCLT shall be acting as the Adjudicating Authority. All appeals from NCLT shall lie with the appellate authority, i.e. the National Company Law Appellate Tribunal (“NCLAT”). In case of individuals and partnerships, the Adjudicating Authority would be the Debt Recovery Tribunal (“DRT”) with the Debt Recovery Appellate Tribunal (“DRAT”) continuing to be the appellate tribunal even for insolvency/ bankruptcy matters. The Supreme Court of India shall have appellate jurisdiction over NCLAT and DRAT.

Corporate Insolvency includes two processes within its ambit, (i) Insolvency Resolution and (ii) Liquidation. The Code prescribes a timeline of 180 days for the insolvency resolution process, which begins from the date the application is admitted by the NCLT. The period is subject to a single extension of 90 days in the event the Adjudicating Authority (being petitioned by a resolution passed by a vote of 75% of the COC) is satisfied that the corporate insolvency resolution process cannot be completed within the period of 180 days. This time period is also applicable to individual insolvency resolution process. During this period, the creditors and the debtor will be expected to negotiate and finalise a resolution plan (accepted by 75% of the financial creditors) and in the event, they fail, the debtor is placed in liquidation and the moratorium lifted. The Code stipulates an interim-moratorium period which would commence after filing of the application for a fresh start process and shall cease to exist after elapse of a period of 180 days from the date of application. During such period, all legal proceedings against such debtor should be stayed and no fresh suits, proceedings, recovery or enforcement action may be initiated against such debtor. However, the Code has also imposed certain restrictions on the debtor during the moratorium period such as the debtor shall not be permitted to act as a director of any company (directly/indirectly) or be involved in the promotion or management of a company during the moratorium period. Further, he shall not dispose of his assets or travel abroad during this period, except with the permission of the Adjudicating Authority.

The bankruptcy of an individual can be initiated by the debtor, the creditors (either jointly or individually) or by any partner of a partnership firm (where the debtor is a firm), only after the failure of the Insolvency Resolution Process (“IRP”) or non-implementation of repayment plan. The bankruptcy trustee is responsible for administration of the estate of the bankrupt and for distribution of the proceeds on the basis of the priority set out in the Code.

Shops and Establishments legislations in various states

The provisions of various Shops and Establishments legislations, as applicable, regulate the conditions of work and employment in shops and commercial establishments and generally prescribe obligations in respect of *inter-alia* registration, opening and closing hours, daily and weekly working hours, holidays, leave, health, termination of services and safety measures and wages for overtime work.

Labour Laws

India has stringent labour related legislations. We are required to comply with certain labour laws, which include the Employees’ Provident Funds and Miscellaneous Provisions Act 1952, the Minimum Wages Act, 1948, the Payment of Bonus Act, 1965, Workmen Compensation Act, 1923, the Payment of Gratuity Act, 1972 and the Payment of Wages Act, 1936, amongst others.

Intellectual Property

Intellectual Property in India enjoys protection under both common law and statute. Under statute, India provides for patent protection under the Patents Act, 1970, copyright protection under the Copyright Act, 1957 and trademark protection under the Trade Marks Act, 1999. The above enactments provide for protection of intellectual property by imposing civil and criminal liability for infringement.

Dear Mr Thomas,

Re: Credit Ratings of Kosamattam Finance Limited (KFL) debt instrument

India Ratings & Research Private Limited (India Ratings) assigns the following debt rating to KFL:-

INR 1billion Proposed Bank Loan: 'IND BBB-', Outlook Stable
(Total rated limit for bank loan stands at INR 7billion)

INR 3billion Additional Nonconvertible debentures: 'IND BBB-', Outlook Stable
(Total rated limit for non-convertible debentures stands at INR 13billion)

In issuing and maintaining its ratings, India Ratings relies on factual information it receives from issuers and underwriters and from other sources India Ratings believes to be credible. India Ratings conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction.

The manner of India Ratings' factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors.

Users of India Ratings' ratings should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information India Ratings relies on in connection with a rating will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to India Ratings and to the market in offering documents and other reports. In issuing its ratings India Ratings must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings can be affected by future events or conditions that were not anticipated at the time a rating was issued or affirmed.

India Ratings seeks to continuously improve its ratings criteria and methodologies, and periodically updates the descriptions on its website of its criteria and methodologies for securities of a given type. The criteria and methodology used to determine a rating action are those in effect at the time the rating action is taken, which for public ratings is the date of the related rating action commentary. Each rating action

commentary provides information about the criteria and methodology used to arrive at the stated rating, which may differ from the general criteria and methodology for the applicable security type posted on the website at a given time. For this reason, you should always consult the applicable rating action commentary for the most accurate information on the basis of any given public rating.

Ratings are based on established criteria and methodologies that India Ratings is continuously evaluating and updating. Therefore, ratings are the collective work product of India Ratings and no individual, or group of individuals, is solely responsible for a rating. All India Ratings reports have shared authorship. Individuals identified in an India Ratings report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only.

Ratings are not a recommendation or suggestion, directly or indirectly, to you or any other person, to buy, sell, make or hold any investment, loan or security or to undertake any investment strategy with respect to any investment, loan or security or any issuer. Ratings do not comment on the adequacy of market price, the suitability of any investment, loan or security for a particular investor (including without limitation, any accounting and/or regulatory treatment), or the tax-exempt nature or taxability of payments made in respect of any investment, loan or security. India Ratings is not your advisor, nor is India Ratings providing to you or any other party any financial advice, or any legal, auditing, accounting, appraisal, valuation or actuarial services. A rating should not be viewed as a replacement for such advice or services. Investors may find India Ratings' ratings to be important information, and India Ratings notes that you are responsible for communicating the contents of this letter, to investors.

It is important that you promptly provide us with all information that may be material to the ratings so that our ratings continue to be appropriate. Notwithstanding the above, ratings may be raised, lowered, withdrawn, or placed on Rating Watch due to changes in, additions to, accuracy of or the inadequacy of information or for any other reason India Ratings deems sufficient.

Nothing in this letter is intended to or should be construed as creating a fiduciary relationship between India Ratings and you or between India Ratings and any user of the ratings.

In this letter, "**India Ratings**" means India Ratings & Research Pvt. Ltd. and any successor in interest.

We are pleased to have had the opportunity to be of service to you. If we can be of further assistance, please contact us at +91-22-4000-1700.
