2. NECESSITY OF THE BUY-BACK

2.1. The current Buy-back is in line with the Company's shareholder-friendly capital allocation practices of returning excess cash to shareholders, thereby increasing shareholders' value in the longer term, and improving the Return on Equity. The Buy-back is being undertaken by the Company to enhance shareholders' value and improve financial ratios. Additionally, the Buy-back is being undertaken for the following reasons:

- The Buy-back will help the Company to distribute surplus funds to its shareholders holding Equity Shares broadly in proportion to their shareholding, thereby, enhancing the overall return to the shareholders;
- The Buy-back, which is being implemented through the Tender Offer as prescribed under the Buy-back Regulations, would involve a reservation of number of Equity Shares as per their entitlement or 15% of the Buy-back Size to be bought back whichever is higher, reserved for the small shareholders. The Company believes that this reservation for small shareholders would benefit a large number of public shareholders, who would get classified as "Small Shareholders" as defined under Regulation 2(i)(n) of the Buy-back Regulations;
- The Buy-back will help in improving financial ratios like earnings per share, return on assets and return on equity calculated on the basis of financial statements, by reducing the equity base of the Company; and
- The Buy-back gives an option to the Eligible Shareholders to either choose to participate in the Buy-back and receive cash in lieu of their Equity Shares which are accepted under the Buy-back or choose not to participate in the Buy-back and get a resultant increase in their percentage shareholding in the Company post Buy-back, without additional investment.
- The current Buyback is in line with the Company's shareholder-friendly capital allocation practices of returning excess cash to shareholders, thereby increasing shareholders' value in the longer term, and improving the Return on Equity.

3. MAXIMUM AMOUNT REQUIRED UNDER THE BUY-BACK AND ITS PERCENTAGE OF THE TOTAL PAID UP CAPITAL AND FREE RESERVES

The maximum amount required under the Buy-back will not exceed ₹ 22,00,00,000/- (Rupees Twenty Two Crores Only) (excluding Transaction Cost) which is not exceeding 25% of the aggregate of the total paid up equity share capital and free reserves of the Company (including securities premium account) as per the audited interim financial statements of the Company as on September 30, 2025. The funds for the implementation of the proposed Buy-back will be sourced out of the securities premium and free reserves of the Company and/or such other sources as may be permitted by law. The funds borrowed from banks and financial institutions, if any, will not be used for the Buy-back.

4. BUY-BACK PRICE AND BASIS OF ARRIVING AT THE BUY-BACK PRICE

The Equity Shares are proposed to be bought back through Tender Offer at a price of ₹ 200/- (Rupees Two Hundred Only) per Equity Share. 2. NECESSITY OF THE BUY-BACK

2.1. The current Buy-back is in line with the Company's shareholder-friendly capital allocation practices of returning excess cash to shareholders, thereby increasing shareholders' value in the longer term, and improving the Return on Equity. The Buy-back is being undertaken by the Company to enhance shareholders' value and improve financial ratios. Additionally, the Buy-back is being undertaken for the following reasons:

- i. The Buy-back will help the Company to distribute surplus funds to its shareholders holding Equity Shares broadly in proportion to their shareholding, thereby, enhancing the overall return to the shareholders;
- ii. The Buy-back, which is being implemented through the Tender Offer as prescribed under the Buy-back Regulations, would involve a reservation of number of Equity Shares as per their entitlement or 15% of the Buy-back Size to be bought back whichever is higher, reserved for the small shareholders. The Company believes that this reservation for small shareholders would benefit a large number of public shareholders, who would get classified as "Small Shareholders" as defined under Regulation 2(i)(n) of the Buy-back Regulations;
- iii. The Buy-back will help in improving financial ratios like earnings per share, return on assets and return on equity calculated on the basis of financial statements, by reducing the equity base of the Company; and
- iv. The Buy-back gives an option to the Eligible Shareholders to either choose to participate in the Buy-back and receive cash in lieu of their Equity Shares which are accepted under the Buy-back or choose not to participate in the Buy-back and get a resultant increase in their percentage shareholding in the Company post Buy-back, without additional investment.
- v. The current Buyback is in line with the Company's shareholder-friendly capital allocation practices of returning excess cash to shareholders, thereby increasing shareholders' value in the longer term, and improving the Return on Equity.

3. MAXIMUM AMOUNT REQUIRED UNDER THE BUY-BACK AND ITS PERCENTAGE OF THE TOTAL PAID UP CAPITAL AND FREE RESERVES

The maximum amount required under the Buy-back will not exceed ₹ 22,00,00,000/- (Rupees Twenty Two Crores Only) (excluding Transaction Cost) which is not exceeding 25% of the aggregate of the total paid up equity share capital and free reserves of the Company (including securities premium account) as per the audited interim financial statements of the Company as on September 30, 2025. The funds for the implementation of the proposed Buy-back will be sourced out of the securities premium and free reserves of the Company and/or such other sources as may be permitted by law. The funds borrowed from banks and financial institutions, if any, will not be used for the Buy-back.

4. BUY-BACK PRICE AND BASIS OF ARRIVING AT THE BUY-BACK PRICE

The Equity Shares are proposed to be bought back through Tender Offer at a price of ₹ 200/- (Rupees Two Hundred Only) per Equity Share. Apple ecosystem in India creates 250K direct jobs

70% of workers women; indirect employment pegged at 750,000

SURAJEET DAS GUPTA
New Delhi, 22 February

Apple Inc has emerged as one of India's largest and fastest-growing creators of blue-collar jobs over the past five years, generating more than 250,000 new direct positions following the launch of the production-linked incentive (PLI) scheme for mobile-phone manufacturing in 2021, which is set to conclude at the end of March 2026. Notably, more than 70 per cent of these employees are women, many of them aged 19 to 24 and first-time job seekers, according to data submitted by various vendors to the Ministry of Electronics and Information Technology (MeitY) under the PLI and Electronics Component Manufacturing (ECM) schemes.

The Cupertino-headquartered company's two principal iPhone vendors in India, the Tata group and Foxconn, have together generated roughly 140,000 direct jobs during this period, according to data, exceeding the 118,290 jobs originally committed under the PLI scheme. The government had set an overall target of 200,000 new direct jobs across all eligible participants over five years.

The remaining 110,000 direct jobs have been created by a mix of Indian, foreign and joint-venture companies, largely micro, small and medium enterprises (MSMEs), which have rapidly expanded within Apple's ecosystem to manufacture iPhone components. These firms are now spread across eight states: Uttar Pradesh, Haryana, Maharashtra, Telangana, Gujarat, Jharkhand, Tamil Nadu and Karnataka.

These companies primarily supply

110,000

additional direct jobs created, mainly in the past three years, by 40 other Apple ecosystem suppliers

components to iPhone assembly plants, while some, such as Jabil and Aequs, export directly into Apple's global supply chain. Beyond these, new direct jobs have been added across Apple's fast-expanding domestic component network of more than 40 companies. Prominent among them are Tata Electronics, Hindalco, Bharat Forge, VVDN Technologies, Wipro PARI, Salcomp, Motherson group, Sunwoda Electronic, Foxlink, SFO Technologies, and TEAL.

At peak operations, Foxconn, which began ramping up production in FY22, employs more than 70,000 workers across its two factories. The Tata group, operating three iPhone facilities, employs about 72,000 people.

What distinguishes this hiring wave is that workforce training has been driven almost entirely by the private sector, without direct technical or financial assistance from the government. Most recruits

undergo several weeks of structured training before moving onto the shop floor. According to industry sources, the average monthly salary in mobile manufacturing has climbed to nearly ₹18,000-₹20,000, up from about ₹11,000 before the PLI scheme took effect.

The government had estimated that mobile-device manufacturing would generate indirect employment at roughly three times the level of direct hiring, around 600,000 jobs, by the end of the PLI period. Apple's ecosystem alone, it's believed, has surpassed that projection, creating an estimated 750,000 indirect jobs. In 2025 (January to December), India's smartphone exports reached \$30 billion, with iPhones accounting for \$23 billion, or 76 per cent of the total. As a consequence, smartphones have vaulted from the country's 167th-ranked export a decade ago to its single largest export between 2015 and 2025.

US TARIFF RULING

SURAJEET DAS GUPTA
New Delhi, 22 February

Apple Inc's big push to exports of iPhones to the United States (US) from India may be affected because the country loses the advantage of a 10 per cent tariff differential vis-a-vis China due to fentanyl tax (targeted tariffs) on the export of mobile phones on the East Asian country.

The tax now has been declared "illegal" by the US Supreme Court.

With duty on mobile phones for both the countries now equalised at zero, Apple Inc, experts say, will find it more cost-effective to export from China rather than India, which has a higher cost of production than China.

This in turn could impact the surging growth of exports of

iPhones from India.

India had a cost disability of 10-14 per cent vis-a-vis China in assembling smartphones in the country. However, with the production-linked incentive (PLI) this handicap was reduced due to the 4-6 per cent incentive provided under the scheme by the government.

With the US imposing a 20 per cent fentanyl tax (fentanyl is an opioid drug) on China last year, the cost difference was not only neutralised but India became an attractive and cost-effective destination for exporting iPhones to the US.

However, the advantage for India was narrowed but not neutralised. Last November fentanyl

duty was brought down to 10 per cent after the US and China reduced punishing tariffs against each other.

Fentanyl duty was imposed on China and a few other countries across products to pressure them to take action on it.

Taking advantage of high duty in China, Apple Inc pushed the pedal on exports from India last year, which is reflected in the fact that exports of smartphones, mainly iPhones, went up by 200 per cent between April and November, hitting \$12.54 billion.

Smartphone exports accounted for over one-fifth of exports to the US in this period and the huge increase not only

Auto, medtech exporters in wait-and-watch mode

SANKET KOUL & ANJALI SINGH
New Delhi/Mumbai, 22 February

With uncertainty persisting over US tariffs, Indian auto component and medical device manufacturers are in a wait-and-watch mode.

This comes as industry insiders say there is little clarity on refunds following scrapping of the earlier tariff policy by the US Supreme Court.

"The US administration may still stall refunds for the time being," the chief executive officer (CEO) of a Delhi-based medtech export firm told *Business Standard*.

On Friday, the US Supreme Court ruled that President Donald Trump exceeded his authority by imposing tariffs under the International Emergency Economic Powers Act (IEEPA), a 1977 law meant for national emergencies.

Following the ruling, Trump announced that from February 24, a 10 per cent tariff

would apply on goods imported into the US under Section 122, including from India, unless exemptions were specified, later raising the baseline tariff to 15 per cent.

Against this backdrop, a senior auto industry executive said that unlike sectors such as textiles or food, auto components cannot be switched overnight as production lines and machinery are often customised to specific vehicle platforms.

India-US trade in auto components continued to expand, with India's exports to the US rising from \$3.56 billion in FY21 to \$6.23 billion in FY25. Over the same period, US exports of auto components into India increased from \$904 million to about \$1.5 billion.

"The industry has not asked for any subsidy

from the government and also does not foresee any immediate disruption from tariff-related uncertainties," he added.

A similar caution is visible in the medical devices sector.

INDIA-US TRADE IN AUTO COMPONENTS CONTINUED TO EXPAND, WITH INDIA'S EXPORTS TO THE US RISING FROM \$3.56 BN IN FY21 TO \$6.23 BN IN FY25

India's medical device exports to the US stood at \$787.57 million in FY25, registering a 9.55 per cent annual growth from \$714.30 million in FY24.

"Exporters are monitoring global trade developments, as they always do in a dynamic geopolitical environment. If there are changes that affect duty structures or refunds, we are confident that our government will take the best view in the larger national interest," said Pavan Chaudhary, chairman of the Medical Technology Association of India (MTAI).

Pre-construction, built-to-suit projects gain momentum in office space leasing

Shortage of large, ready-to-move grade-A office spaces in prime locations due to land paucity and slower approval processes is driving demand for BTS spaces

PRACHI PISAL
Mumbai, 22 February

India's office market is witnessing an increase in built-to-suit (BTS) developments and pre-construction leasing by multinational corporations (MNCs) and large companies to stay ahead of the curve amid a strain in Grade A office supply.

And, demand across the top cities is getting concentrated into three broad categories – global capability centres (GCCs), data centres, and large flexible workspace operators. "Landmark transactions such as JP Morgan's expansion in Mumbai and Google's large campus commitments in Bengaluru underscore how GCCs are locking in future-ready, grade A campuses well before completion. Similarly, the Princeton Digital Group deal highlights the specialised, built-to-suit nature of the rapidly expanding data centre segment," said Propstack co-founder Raja Seetharama, noting a clear structural shift in pre-commitment activity.

Across markets, companies such as Uber, TCS, Bank of America, American Express, Optum, DXC Technologies, Eaton, and Deloitte have pre-leased sizeable office blocks to stay ahead of the leasing curve in 2025.

Peush Jain, managing director (MD), commercial leasing & advisory, Anarock Group, said, "Shortage of large, ready-to-move grade A office spaces in prime locations due to land paucity or slower approval process is prompting large occupiers to scout for suitable BTS spaces. Also, developers are cautious about oversupply of office spaces similar to previous years, and rising financing costs. Further, demand from GCCs, information technology (IT)/ information technology-enabled services (ITeS), and banking, financial services and insurance (BFSI) sectors has grown steadily. Such BTS projects become handy as

these companies require customised layouts, a strong digital infrastructure, security, and scalability."

Veera Babu, executive MD, tenant representation, Cushman & Wakefield, describes this trend as a structural shift rather than a temporary spike.

In cities like Bengaluru, Delhi NCR, and Mumbai, annual demand has consistently exceeded completions by 30–40 msf.

Large integrated campuses developed by leading players such as DLF, Brookfield, Embassy, Bagmane, K Raheja Corp, and Sattva are operating at near-full occupancy. As a result, large occupiers, especially GCCs, IT services firms, and BFSI players are committing to space well in advance to secure quality assets in core locations.

This scarcity is most pronounced in premium, environmental, social and governance (ESG)-compliant grade A stock.

Babu said nearly 15 msf scheduled for delivery in 2026–27 is already pre-leased. And, the broader demand pipeline stands at around 60 msf with large occupiers actively evaluating premium office requirements across key Indian cities.

According to Anarock Research, net office leasing across the top seven cities reached an all-time high of nearly 55 msf in 2025, while new completions stood lower at 51.83 msf.

The trend of absorption outpacing supply was also visible in 2024.

This supply-demand gap has been particularly acute in prime micro-markets, where vacancy levels have compressed to around 5 per cent, according to Babu. "Many tenants commit early so that they can lock in rentals and thereby save themselves from future price increases in high-demand micro markets," Jain added.

The Company believes that this reservation for small shareholders would benefit a large number of public shareholders, who would get classified as "Small Shareholders" as defined under Regulation 2(i)(n) of the Buy-Back Regulations;

iii. The Buy-back will help in improving financial ratios like earnings per share, return on assets and return on equity calculated on the basis of financial statements, by reducing the equity base of the Company; and

iv. The Buy-back gives an option to the Eligible Shareholders to either choose to participate in the Buy-back and receive cash in lieu of their Equity Shares which are accepted under the Buy-back or choose not to participate in the Buy-back and get a resultant increase in their percentage shareholding in the Company post Buy-back, without additional investment.
